Calendar, 1934-1935

FIRST TRIMESTER
September 20-21-22.................................................................................. Registration Days
September 24, Monday.............................................................................. Classes Begin
November 29-30, December 1................................................................. Thanksgiving Recess
December 12, Wednesday....................................................................... Classes end for First Trimester
December 13, Thursday.......................................................................... Examinations

SECOND TRIMESTER
December 14, Friday................................................................................ Second Trimester Begins
December 21-January 1............................................................................ Christmas Recess
January 2, Wednesday............................................................................ Classes Resumed
March 12, Tuesday................................................................................... Classes end for Second Trimester
March 13, Wednesday............................................................................. Examinations
March 14-17.............................................................................................. Spring Recess

THIRD TRIMESTER
March 18, Monday.................................................................................. Third Trimester Begins
June 1, Saturday...................................................................................... Classes end for Third Trimester
June 3-6...................................................................................................... Examinations
June 10, Monday..................................................................................... Commencement Day
ADMINISTRATIVE OFFICERS
REGENTS OF THE UNIVERSITY SYSTEM OF GEORGIA
OFFICERS

Marion Smith, Chairman.
Sandy Beaver, Vice-Chairman.
L. R. Siebert, Secretary and Treasurer.

Eugene Talmadge,
Governor of Georgia

Marion Smith, Atlanta,
State-at-Large

S. H. Morgan, Guyton,
1st. Congressional District,

W. J. Vereen, Moultrie,
2nd. Congressional District,

George C. Woodruff, Columbus,
3rd. Congressional District,

Cason J. Callaway, LaGrange,
4th. Congressional District,

Clark Howell, Jr., Atlanta,
5th. Congressional District,

W. Elliott Dunwody, Jr., Macon,
6th. Congressional District,

E. S. Ault, Cedartown,
7th. Congressional District,

M. D. Dickerson, Douglas,
8th. Congressional District,

Sandy Beaver, Gainesville,
9th. Congressional District,

R. P. Burson, Monroe,
10th. Congressional District,

Ex officio

Term concurrent with that of Governor

Term expires July 1, 1939

Term expires July 1, 1935

Term expires July 1, 1937

Term expires July 1, 1935

Term expires July 1, 1935

Term expires July 1, 1935

Term expires July 1, 1937

Term expires July 1, 1939

Term expires July 1, 1937

Philip Weltner, Chancellor, University System of Georgia.

COMMITTEES

Education—Messrs. Beaver, Chairman, Callaway, and Dunwody.

Organization and Law—Messrs. Ault, Chairman, Dickerson, and Talmadge.

Finance—Messrs. Morgan, Chairman, Vereen, and Woodruff.

Visitation—Messrs. Morgan, Chairman, Dickerson, and Burson.

P. W. A. Building—Messrs. Howell, Chairman, Beaver, and Woodruff.
FACULTY

GEORGE LOMBARD KELLY, B.A., B.S.Med., M.D., Vice-Dean

PROFESSORS

Office Address

Joseph Akerman, B.A. (Ga. '94), M.D. (Hopkins '00)....831 Fifteenth Street
Professor of Obstetrics

Sam Brock, B.A. (Ga. '11), M.D. (Hopkins '00),
M.S., (Univ. of Minn. '22) School of Medicine
Professor of Surgery

Claude McKinley Burpee, B.S. Med. (Ga. '20),
M.D. (Ga. '22) University Hospital
Professor of Pediatrics

William F. Hamilton, B.A. (Pomona Col. '17),
Ph.D. (Cal. '21) School of Medicine
Professor of Physiology and Pharmacology

George Lombard Kelly, B.A. (Ga. '11), B.S.Med. (Ga. '22), M.D. (Ga. '24) School of Medicine
Professor of Anatomy

Joseph Krafka, Jr., B.A. (Lake Forrest '14), M.A. (Lake Forrest '15), Ph.D. (Ill. '19), M.D. (Ga. '33) School of Medicine
Professor of Microscopic Anatomy

Carlton Howard Maryott, B.A. (Brown '04), Ph.D. (Yale '11) School of Medicine
Professor of Chemistry

Edgar Rudolph Pund, B.A. (Ga. '14), M.D. (Ga. '18) School of Medicine
Professor of Pathology

Everett S. Sanderson, B.S. (Mass. State Col. '16), M.S. (Yale '21), Ph.D. (Yale '22), M.D. (Wash. Univ. '34) School of Medicine
Professor of Bacteriology and Public Health

Virgil Preston Sydenstricker, B.A. (W. & L. '10), M.A. (W. & L. '11), M.D. (Hopkins '15) University Hospital
Professor of Medicine

CLINICAL PROFESSORS

William Whatley Battey, M.A. (Belmont Abbey '00), M.D. (Ga. '04) 561 Telfair Street
Professor of Clinical Surgery

Guy Talmadge Bernard, M.D. (Ga. '07) 204 Thirteenth Street
Professor of Clinical Surgery and Dermatology

Charles Iverson Bryans, M.D. (Ga. '04) S. F. C. Building
Professor of Clinical Ophthalmology and Oto-Laryngology

Ralph Hill Chaney, B.A. (Oberlin '09), M.A. (Oberlin '13), M.D. (Pa. '14) 1001 Greene Street
Professor of Clinical Surgery
CLINICAL PROFESSORS—Continued

Charles Williams Crane, M.D. (Ga. ’98)............1345 Greene Street
Professor of Clinical Surgery

William Johnston Cranston, M.D. (Ga. ’08)........1345 Greene Street
Professor of Clinical Medicine

William Henry Goodrich, B.A. (Ga. ’93), M.D.
(Ga. ’97)........................................S. F. C. Building
Professor of Clinical Gynecology

Lysander Palmer Holmes, M.D. (Vanderbilt ’12)....S. F. C. Building
Professor of Clinical Roentgenology

William Richardson Houston, M.D. (Ga. ’02)........1345 Greene Street
Professor of Clinical Medicine

James Meriweather Hull, M.D. (Ga. ’79)............S. F. C. Building
Professor of Clinical Ophthalmology and Oto-Laryngology

Andrew Jones Kilpatrick, M.D. (Ga. ’96)............407 Seventh Street
Professor of Clinical Obstetrics

Henry Middleton Michel, M.D. (Ga. ’98)............S. F. C. Building
Professor of Clinical Orthopedic Surgery

William Anthony Mulherin, B.A. (Spring Hill ’91),
M.A. (Spring Hill ’00), M.D. (Harvard ’01),
D. Sc. (Ga. ’27).....................................1001 Greene Street
Professor of Clinical Pediatrics

Eugene Edmund Murphey, M.D. (Ga. ’98)............432 Telfair Street
Professor of Clinical Medicine and Lecturer in Preventive Medicine

Robert Lewis Rhodes, B.A. (Emory ’06), M.D.
(Hopkins ’10).......................................S. F. C. Building
Professor of Clinical Surgery

George Albert Traylor, B.S. (Furman ’00),
M.D. (Ga. ’04)......................................S. F. C. Building
Professor of Clinical Surgery

VISITING CLINICAL PROFESSORS

James Ryan Garner, M.D. (U. of Va. ’00)........Atlanta, Georgia
Visiting Professor of Forensic Medicine

Newdigate Moreland Owensby, M.D. (U. of Md.
’04)..................................................Atlanta, Georgia
Visiting Professor of Psychiatry
ASSOCIATE CLINICAL PROFESSORS

JAMES HARVEY BUTLER, M.D. (Ga. '14)..........................S. F. C. Building
Associate Professor of Clinical Medicine

MOSES S. LEVY, M.D. (Ga. '06).................................S. F. C. Building
Associate Professor of Clinical Surgery

SAMUEL JOSEPH LEWIS, M.D. (Ga. '11)..........................S. F. C. Building
Associate Professor of Clinical Ophthalmology and Oto-Laryngology

HUGH NELSON PAGE, M.D. (Va. '05)..............................S. F. C. Building
Associate Professor of Clinical Surgery

EVERARD ANSLEY WILCOX, B.S. (Davidson '07), M.A.
(Davidson '09), M.D. (Ga. '10).................................1117 Glenn Avenue
Associate Professor of Clinical Gynecology

ASSISTANT PROFESSORS

WILLIAM RAGLAND BROWN, B.A. (Mercer '31), M.S.
(Univ. Cinti. '32), Ph.D. (Univ. Cinti. '34)...........School of Medicine
Assistant Professor of Chemistry

ROBERT BARTON DIENST, B.A. (Baylor '25), M.A.
(Baylor '26), Ph.D. (Chicago '33)...........................School of Medicine
Assistant Professor of Bacteriology and Public Health

FRED ALBERT METTLER, B.A. (Clark '29), M.S.
(Cornell '31), Ph.D. (Cornell '33),
M.S. (St. Louis '34)........................................School of Medicine
Assistant Professor of Anatomy

ROBERT ARTHUR WOODBURY, B.S. (Kansas '24),
M.S. (Kansas '28), Ph.D. (Kansas '31),
M.D. (Chicago '34)........................................School of Medicine
Assistant Professor of Physiology and Pharmacology

EMIL BRYANT WOODS, B.A. (Mo. '23), M.A. (Mo. '24),
M.D. (St. L. Univ. '27)....................................School of Medicine
Assistant Professor of Obstetrics and Gynecology

ASSISTANT CLINICAL PROFESSORS

ALBERT ALONZO DAVIDSON, M.D. (Vanderbilt '93)....1116 Greene Street
Assistant Professor of Clinical Medicine
ASSISTANT CLINICAL PROFESSORS—Continued

Frank Lansing Lee, B.S.Med. (Ga. '19), M.D.  
(Ga. '21)............................................................S. F. C. Building  
Assistant Professor of Clinical Medicine

Henry Getzen Mealing, B.S.Med. (Ga. '20), M.D.  
(Ga. '22)............................................................S. F. C. Building  
Assistant Professor of Clinical Medicine

William H. Roberts, M.D. (Ga. '13)..............................828 Greene Street  
Assistant Professor of Clinical Oncology

Joseph Righton Robertson, M.D. (U. of Md. '10)........1345 Greene Street  
Assistant Professor of Clinical Surgery

John Hays Sherman, B.S.Med. (Ga. '18), M.D.  
(Ga. '25)............................................................S. F. C. Building  
Assistant Professor of Clinical Surgery

John William Thurmond, M.D. (Ga. '26).................407 Seventh Street  
Assistant Professor of Clinical Obstetrics

Andrew Augustus Walden, M.D. (Medico-Chir.,  
Phila. '02)..........................................................508 Carolina Avenue  
Assistant Professor of Clinical Medicine

ASSOCIATE

Frank H. Van Wagoner, B.A. (Utah '27), M.B.  
(Northwestern '32), M.S. (Northwestern '32),  
M.D. (Northwestern '33)........................................School of Medicine  
Associate in Pathology

CLINICAL ASSOCIATES

Monte Preston Agee, M.D. (Ga. '21)............................S. F. C. Building  
Associate in Clinical Gynecology

Henry Pierce Harrell, M.D. (Ga. '20)........................S. F. C. Building  
Associate in Clinical Pediatrics

Francis Xavier Mulherin, B.A. (Sacred Heart '06),  
M.D. (Pa. '11)....................................................1001 Greene Street  
Associate in Clinical Pediatrics

Irvine Phinizy, B.S. (Ga. '19), M.D. (Ga. '23)............S. F. C. Building  
Associate in Clinical Medicine
CLINICAL ASSOCIATES—Continued

Charles Douglas Ward, B.S. (Ga. '15), M.D. (Ga. '20) 1345 Greene Street
  Associate in Clinical Surgery

John Coskery Wright, M.D. (Ga. '08) S. F. C. Building
  Associate in Clinical Gynecology

Peter Burum Wright, M.D. (Ga. '20) S. F. C. Building
  Associate in Clinical Surgery

INSTRUCTORS

Joe Denton Combs, B.A. (Drury '29), M.A. (Ill. '31), Ph.D. (Ill. '34) School of Medicine
  Instructor in Anatomy

Elkin Vogt, B.S. (Ga. '23) School of Medicine
  Instructor in Physiology and Pharmacology

CLINICAL INSTRUCTORS

John Wilkerson Brittingham, Ph.B. (Georgetown '22), M.A. (Georgetown '23), M.D. (Hopkins '27) 1345 Greene Street
  Instructor in Clinical Medicine

Joseph Dewey Gray, M.D. (Ga. '20) 1345 Greene Street
  Instructor in Clinical Medicine

King Walker Milligan, Ph.G. (Ga. '08), M.D. (Ga. '08) 942 Greene Street
  Instructor in Clinical Medicine

John Wesley Oden, M.D. (U. of Nashville '08) Gracewood, Georgia
  Instructor in Clinical Pediatrics

Richard Bynum Weeks, B.S.Med. (Ga. '23), M.D. S. F. C. Building
  Instructor in Clinical Surgery

George Washington Wright, B.S. (Ga. '22), M.D. S. F. C. Building
  Instructor in Clinical Surgery

R. C. McGahee, M.D.
F. X. Mulherin, M.D.
P. A. Mulherin, M.D.
C. E. Tessier, M.D.
L. Foster, M.D.

OBSTETRICS
J. Akerman, M.D., Chief.
E. B. Woods, M.D.
J. W. Thurmond, M.D.

ANNOUNCEMENT FOR 1934-1935

The one hundred and fourth session of the University of Georgia School of Medicine, began September 24, 1934, and will end June 10, 1935.

The University of Georgia has grown in part by the creation of new departments, and in part by the absorption of certain already existing institutions founded independently, one of which was the Medical College of Georgia in Augusta, founded in 1828.
The absorption of the Medical College of Georgia began in 1873, when by mutual consent of the respective Boards of Trustees it became affiliated with the University as its Medical Department. This absorption was consummated in 1911. By special enactment of the Legislature the University took possession of the property and assumed control of the management of its Medical Department, which has since operated, like the other departments, under the laws and regulations of the University.

The state supported institutions of higher learning in Georgia were integrated into the University System of Georgia by legislative enactment at the regular session of the General Assembly in 1931. Under the articles of the Act all existent boards of trustees were abolished and control of the System vested in a board of regents which has all the power and rights of the former governing boards of the several institutions. Control of the System by the Board of Regents was effective January 1, 1932.

DISCIPLINE AND GENERAL REGULATIONS

The discipline of the School of Medicine is in the hands of the Dean and the Executive Committee. Formal regulations are few and general in character.

The State of Georgia extends the privileges of the University within the limits of its capacity to all persons who are qualified for admission. It is maintained at public expense for the public good. It cannot, however, be the patron of inefficiency, idleness, or dissipation. Its classes have no room except for those who diligently pursue the studies of their choice and are willing to be governed in their conduct by the rules of propriety. Every student owes to the public a full equivalent of expenditures in his behalf, both while in the institution and afterward.

MEDICAL SCHOOL BUILDING

The School of Medicine is housed in a four-story brick structure, situated on the College campus covering about forty-five acres. It is near the geographical center, and about one mile from the business center, of Augusta, and is easily accessible by trolley from all parts of the city.

The first floor of the building has formerly been used for the out-patient department. This space will be altered during the current session in order to accommodate the department of physiology and pharmacology. On the second floor are located the administration offices, the library, and the departments of chemistry and bacteriology and public health. On the third and fourth floors are the departments of anatomy, pathology, physiology, pharmacology, and surgery, and an animal room containing fifty individual cement animal cages.

HOSPITALS

The City of Augusta, in 1914, completed upon the school grounds and in immediate proximity to the school building a hospital plant especially designed as a teaching hospital for the School of Medicine, and known as the Uni-
1. THE UNIVERSITY HOSPITAL
2. MEDICAL DEPARTMENT, UNIVERSITY OF GEORGIA.
3. DOUGHTY NURSES' HOME. UNIVERSITY HOSPITAL.
4. THE WILHENFORD HOSPITAL FOR WOMEN AND CHILDREN.
University Hospital. The buildings, equipped, cost over a half million dollars. They are of modern fire-proof construction, and are furnished throughout with standard appliances of the best material and design. Of the total of 290 beds, approximately 200 are available without restriction for teaching purposes.

In 1934 a two-story addition to the University Hospital, named the Milton Antony Wing after the founder of the School of Medicine, was completed. Funds for the erection of this building were contributed by the Federal Public Works Administration, the Alumni Association of the School of Medicine, the City of Augusta and the County of Richmond. The first floor of this building houses the out-patient department, while the second floor is a contagious disease hospital.

The University Hospital is maintained by the City of Augusta. The exclusive medical and surgical control of the Hospital is vested in the University of Georgia School of Medicine. The attending staff is composed of the members of the faculty of the School of Medicine, thus assuring a proper use of the clinical material of the hospital for purposes of teaching.

The Wilhenford Hospital, for children, containing fifty beds, and located adjacent to the school campus, is under the medical and surgical care of the teaching staff in Pediatrics and is used for clinical teaching.

The Georgia State School for Mentally Defective Children, which is operated by the State Board of Control, is located about ten miles from Augusta, and provides occasional demonstrations in the study of pediatric psychiatry.

CLINICAL OPPORTUNITIES

The University has medical and surgical control of the charity patients of the City of Augusta. The Out-Patient Department of the University Hospital is housed on the first floor of the Milton Antony Wing of the Hospital and has a large attendance, averaging about one hundred and fifty patients a day. A wealth of teaching material is derived from this source. Clinics are held daily by members of the out-patient staff.

Patients occupying free beds in the University Hospital and the Wilhenford Children’s Hospital are used as teaching material. Hospital patients are examined by fourth-year students who record the physical and laboratory findings on the patients’ charts. Hospital patients are also used for demonstrations in the course in physical diagnosis in the second year.

A course in domiciliary medicine is given to the fourth-year students whose work in the patients’ homes is directly supervised by a special instructor employed for this purpose. The students examine these patients thoroughly and assist in their treatment which is supervised by the special instructor. This work is not only a source of great benefit to the student but is also of great help to the patient, who in this way receives more thorough care than would otherwise be possible. It is unnecessary to emphasize the opportunity that the student has in this course to study medicine at the bedside and to gain practical knowledge of the manner of handling patients in the home.
AUTOPSIES

The City Morgue with specially designed autopsy and cold storage room occupies space in the University Hospital. Students and Staff attend autopsies which are conducted by the staff in pathology.

LIBRARY

The Library is located in the south wing of the school building, in quarters that afford retirement, ample room and good light. It is open from nine A. M. to six P. M., except Saturdays, when it closes at noon. A full time Librarian is in charge. During the school session it is open five evenings a week under the supervision of a student assistant Librarian.

There are in the Library about 9,000 bound volumes. The list of books comprises many standard reference works in medicine and surgery and the fundamental sciences, as well as many of the latest textbooks and monographs. The Library receives more than ninety current journals in English, French and German, in the fields of Chemistry, Anatomy, Physiology, Pharmacology, Bacteriology, Pathology, Medicine, Surgery and allied subjects. The files of many of these journals are complete to date. The Library is maintained in part by appropriation from the general fund and in part by the income from the Library Endowment, a gift from the late Doctor William J. Young. The income from this endowment is used only for books and periodicals.

REQUIREMENTS FOR ADMISSION

The minimum requirement for admission is a four-year high school education, or its full equivalent, and two years of work in a college of arts and sciences approved by the Council on Medical Education and Hospitals of the American Medical Association.

The two years of college work shall comprise at least sixty semester hours, exclusive of military and physical education, extending through two years of thirty-two weeks each, exclusive of holidays, in an approved college.

SUGGESTIONS REGARDING INDIVIDUAL PREMEDICAL SUBJECTS

(a) Chemistry. Twelve semester hours required, of which at least eight semester hours must be in general inorganic chemistry, including four semester hours of laboratory work; and four semester hours in organic chemistry, including two semester hours of laboratory work. In the interpretation of this rule, work in qualitative analysis may be counted as general inorganic chemistry.

(b) Physics. Eight semester hours required, of which at least two must be laboratory work. It is urged that this course be preceded by a course in trigonometry.
(c) **Biology.** Eight semester hours required, of which four should consist of laboratory work. This requirement may be satisfied by a course of eight semester hours in either general biology or zoology, or by courses of four semester hours each in zoology and botany, but not by botany alone.

(d) **English Composition and Literature.** The usual introductory college course of six semester hours, or its equivalent, is required.

(e) **Nonscience Subjects.** Of the sixty semester hours required as the measurement of two years of college work, at least eighteen, including the six semester hours of English, should be in subjects other than the physical, chemical or biologic sciences.

(f) **Foreign Language.** A reading knowledge of a modern foreign language is strongly urged. If the reading knowledge of this language is obtained on the basis of high school work, the student is urged to take another language in his college course. It is not considered advisable, however, to spend more than twelve of the required sixty semester hours on foreign languages.

**Schedule of Subjects of the Two-Year Premedical College Course**

---

*A semester hour is the credit value of sixteen weeks work consisting of one lecture or recitation period per week, each period to be not less than fifty minutes net, at least two hours of laboratory work to be considered as the equivalent of one lecture or recitation period.*
(g) In General. This premedical course in both quantity and quality must be such as to make it acceptable as the equivalent of the first two years of the course leading to the degree of Bachelor of Science or Bachelor of Arts in approved colleges of arts and sciences.

APPLICATIONS FOR ADMISSION

Students desiring admission will be furnished with proper blanks, together with instructions for filling them out. Application forms, when properly filled out, should be returned accompanied by the statutory fee of two dollars, to the School of Medicine at Augusta. In conformity with the State law, all credentials are acted upon by the State Entrance Examiner.

Application for admission should be made early. June 15th is the final date for receiving applications for admission to the first-year class. If there are any vacancies, applications for advanced standing may be considered after June 15.

The number of students accepted for each class is limited to forty. Preference is given to residents of Georgia. The Committee on Admissions considers the merits of each applicant with the utmost care. The following factors are taken into consideration in selecting from the list of applicants for admission: scholarship, score on the Medical Aptitude Test of the Association of American Medical Colleges, and rating given by three members of the faculty on personal interview. The applicant is required to take the aptitude test and must report at the college for the personal interview. At the time of this interview the applicant is also required to take a physical examination and to pass it satisfactorily to be eligible for admission.

Upon being notified of acceptance, the applicant must deposit twenty-five dollars with the school, as otherwise the place will not be held open to the exclusion of some other qualified applicant. This deposit will not be returned under any condition but will be credited on fees and deducted from the payment due when the student matriculates.

Women are admitted on the same basis as men.

All communications should be addressed to the University of Georgia School of Medicine, Augusta, Georgia.

ADMISSION TO ADVANCED STANDING

A student desiring admission to advanced standing is required to present satisfactory evidence that his preliminary and medical education is equivalent to that required of the class to which admission is sought. All high school and college credentials are passed upon in the same manner as those of the applicant for admission to the first year course. Students from accredited medical schools whose record of work is satisfactory may be admitted to advanced standing without examination, though the right of requiring examination is not waived. Students will not be received into any class unless there are vacancies.
REQUIREMENTS FOR GRADUATION

A candidate for the degree of Doctor of Medicine from the University of Georgia School of Medicine, must be of good moral character, and at least twenty-one years of age. He must have successfully completed four years of medical study in accredited institutions, the last year of which shall have been in this school. He must be free from indebtedness to the School of Medicine.

LICENSING BOARD EXAMINATIONS

The members of the graduating class may take the examination given by the Georgia State Board of Medical Examiners in June shortly after commencement. Examinations in the past have been held in Augusta and this arrangement will in all probability continue. The examination fee is $20.00.

Under reciprocity agreements thirty-seven other states accept licentiates of the Georgia State Board of Medical Examiners.

Parts I and II of the National Board examinations are held under the auspices of the School of Medicine in Augusta. Part III has to be taken elsewhere. Part I covers the work of the first two years and Part II the work of the last two years in the Medical School. Part III consists of a practical examination after the satisfactory completion of an internship of one year.

Fees for the examinations of the National Board are as follows:

<table>
<thead>
<tr>
<th>Examination</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Registration</td>
<td>$ 5.00</td>
</tr>
<tr>
<td>Part I</td>
<td>20.00</td>
</tr>
<tr>
<td>Part II</td>
<td>20.00</td>
</tr>
<tr>
<td>Part III, Admission</td>
<td>$10.00</td>
</tr>
<tr>
<td>Final Payment</td>
<td>30.00 $40.00</td>
</tr>
</tbody>
</table>

The fee for Part III may be borrowed from the National Board of Medical Examiners on a note for one year.

The Certificate of the National Board is recognized by the licensing authorities of forty-one states and three territories and the District of Columbia. It is also recognized by certain Federal services and by some foreign countries. Diplomates of the National Board are exempted from the scientific examination given by the American College of Surgeons and are admitted to the Mayo Foundation without taking the usual examination.

ALPHA OMEGA ALPHA

The medical honor fraternity, Alpha Omega Alpha, has established a chapter at the University of Georgia School of Medicine. A selected number of each graduating class are approved for candidacy by the officers of the school and elections are made by the active members of the chapter.
SPECIAL STUDENTS

Those desiring to take certain courses only may be registered as special students upon securing the approval of the Dean and making satisfactory arrangements with the heads of the departments in which the work is to be done.

POST GRADUATE WORK

Graduates in medicine who desire to do post-graduate work may make the necessary arrangements for it with the Dean and the heads of the departments in which they wish to work. No fees will be charged residents of the State of Georgia or alumni of this school, except a breakage fee of $10.00, which, after deduction for any breakage, will be returned.

FELLOWSHIPS

Beginning with the current session, five fellowships were offered, with a stipend of $900.00 per annum. These fellowships are in the following departments: medicine (two), surgery, anatomy and pathology. These fellowships will also be offered during the 1935-1936 session.

EXAMINATION AND PROMOTION

In order to be eligible for credit in major courses (those of one hundred hours or more) the student must attend a minimum of eighty per cent of the class exercises of each course. Time lost by absences for any reason in major or minor courses must be made up to the satisfaction of the instructor in charge of the course.

Final examinations are held at the conclusion of the various courses. These examinations may come at the end of the first, second or third trimester, or at any time within a trimester that a course may be completed. The passing mark is 75 per cent. A student making below 75 and above 70 is conditioned in the course in question and may be given a re-examination in the subject if a similar failure is not made in more than one other subject. Students who make below 75 in three different courses, major or minor, within one year will be required to repeat the year's work or withdraw from school. Whenever a student makes a grade of less than 70, the course must be repeated with credit before promotion to the next year or before graduation. Students who are required to withdraw from school on account of scholastic failures will not be re-admitted.

At the end of each school year there will be a meeting of the Promotion Boards to pass on the promotion of each individual student. Recommendations for degrees are made by the faculty as a whole.

Any student who by reason of a lack of sobriety, honesty or moral character manifests a distinct unfitness for the practice of medicine, will be required to withdraw from school.
REGISTRATION

Each student before beginning any class work is required to register at the office. All credentials pertaining to entrance requirements must have been approved. Students will not be permitted to register later than two weeks after the opening of the session.

Late Registration Fee: A fee of $10.00 is charged students who register later than the regular registration day.

TUITION AND FEES

In conformity with the regulations governing other branches of the University of Georgia, the School of Medicine does not require tuition fees of residents of the state. For such residents the laboratory and other fees are as follows:

Laboratory fees, $185.00 each year, payable $95.00 at the time of registration in September and $90.00 prior to January 31.

The fees for non-residents are $365.00 each year. This sum includes tuition and laboratory fees.

Of each student a deposit of $10.00 is required to cover possible injury to the property of the University. The unused portion of this deposit is returned at the end of the college year.

Each student upon graduation is charged a diploma fee of $5.00.

REFUND OF FEES

No refund of laboratory fees is made except on account of serious illness. A student withdrawing within four weeks of the opening of the first trimester, who secures from the Dean a statement of honorable standing and from a physician a certificate of inability to remain in attendance, is allowed a refund of one-half of the first payment due on fees at the time of registration, and all of any amount paid on the second payment due on fees prior to January 31.

No refund is allowed a student who withdraws later than four weeks after the beginning of the first trimester.

STUDENTS' AID

Charles McDonald Brown Scholarship Fund. This endowment was established in 1883, by the Hon. Joseph E. Brown, ex-Governor of Georgia, in memory of his son, Charles McDonald Brown, of the Class of 1878, for the purpose of aiding young men in defraying the expenses of their education. The interest on this fund is lent to worthy young men on condition that they obligate themselves to return it with four per cent interest.

By the rules and regulations for the administration of this fund any student in the School of Medicine is eligible to participate in its benefit. A special circular of information concerning the fund and blank forms of application will be supplied on request. Applications for loans from this fund must be made on these forms and must be in the hands of President S. V. Sanford, Athens, Ga., by May 15. The grants are made in June by the Board of Regents. Only $120.00 a year is allowed a borrowing student.
A loan fund donated by alumni for the aid of sons of physicians makes available a few emergency loans to students who might not otherwise be able to continue the medical course. Unfortunately this fund is a very small one at this time and only the most needy of the students who are sons of physicians can be aided.

The Students Loan Fund, founded in 1926 by Dr. James Russell Howell of the class of that year, was begun for the purpose of assisting "deserving students in equipping themselves for the medical profession." Contributions to the fund consist of the unused portions of breakage fees deposited by members of the fourth year class, these unused portions being left by each graduating class as a memorial. The names of the students and the amount donated in this manner by each member of the class are duly placed on permanent record.

**STUDENT EXPENSES**

In addition to the fees payable to the college, from $50.00 to $100.00 a year is required to cover the cost of textbooks and instruments used by the student.

Suitable board and room may be obtained in the vicinity of the college for $7.00 to $8.00 a week.

Each student is required to have a suitable microscope of his own. Purchase of a microscope may be arranged through the office and payment may be made in four installments. The student is permitted to make his choice from several standard microscopes or to bring a satisfactory microscope with him.

There are no extra fees with the exception of the diploma fee.

**GENERAL PLAN OF INSTRUCTION**

The regular course extends through four years of thirty-three weeks net, from the latter part of September to the first part of June. Each year is divided into three trimesters of eleven weeks each, exclusive of holidays.

The work of the first two years is devoted principally to a study of the fundamental sciences of Chemistry, Anatomy, Physiology, Pharmacology, Pathology and Bacteriology. The instruction is largely practical and most of the time is spent by the student in the laboratory, working under supervision. The laboratory work is supplemented by lectures, quizzes and conferences, which are designed to explain the fundamental principles of the subjects studied and to emphasize their relation to the study of medicine.

In the third trimester of the second year clinical work is introduced by the courses in physical diagnosis, clinical diagnosis and minor surgery.

During the third year, besides attending lectures and demonstrations, the student spends a considerable part of his time in the medical and surgical clinics. Here, under supervision of the attending staff, he examines patients, prepares case records, makes diagnoses and outlines the indicated treatments.

In the fourth year, instruction is given almost wholly in the wards of the hospital, in the out-patient department, and in the course in domiciliary medicine, in the patients' homes.

A detailed description of the work in the various years is given under the separate departmental announcements.
DEPARTMENTS

ANATOMY

Dr. G. Lombard Kelly, Professor.
Dr. Joseph Kraflka, Professor.
Dr. Fred A. Mettler, Assistant Professor.
Dr. Joe D. Combs, Instructor.
Dr. Walter A. Stultz, Fellow.

The facilities of the department include a well-lighted dissecting room with supply-room and embalming and storage-room for cadavers, laboratory for microscopic anatomy with adjacent preparation room, lecture-room with projection apparatus, a museum of anatomical specimens and an animal house with an ample supply of laboratory animals. The laboratories are suitably equipped with apparatus and accessories necessary for teaching and investigation. For embryology, histology and neuro-anatomy there are sets of microscopic slides that are loaned to the students.

The required courses given by the department are designed (1) to enable the student to secure a comprehensive knowledge of the anatomy of the human body, gross and microscopic, its mode of development, and the factors, as far as they are known, that govern the healthy growth and maintenance of its parts; (2) to develop in the student independence and initiative and the ability to make accurate, firsthand observations and records. The courses in gross and microscopic anatomy are correlated as closely as is practicable. Elective courses are offered for students who desire to extend their knowledge of anatomy beyond that obtained in the required courses, and for those wishing to undertake investigation of anatomical problems.

101. Gross Anatomy. The basis of this course consists of the dissection, by each student, of a lateral half of the human body. This work is done under close personal observation of the teaching staff and oral examinations are held at stated intervals. Each student is supplied with a set of bones for the study of osteology. In this latter course there are three didactic hours a week for the first trimester and each student is required to draw all the bones in the body. For study of the individual bones of the skull the students in groups use disarticulated skulls. First year, first trimester, 18 hours a week; second trimester, 15 hours a week, 363 hours. Professors Kelly and Mettler, and Dr. Stultz.

101A. Clinical Anatomy. A new course to stimulate the interest of the student in gross anatomy. The demonstrations and lectures are given by clinical professors in the various specialties. The class sees lumbar and cisterna
punctures, paracentesis thoracis and abdominis and like procedures and attends clinics on cases that are correlated with gross anatomy. First year, first trimester, 1 hour a week, 11 hours. Members of the Clinical Staffs.

102. HISTOLOGY. The study of the elementary tissues is followed by that of the organs, including the special sense organs. This is a lecture and laboratory course and consists of the microscopic study of the usual prepared sections; in addition fresh tissues are used. The instruction is chiefly individual. First year, first trimester, 14 hours a week, lectures 55 hours, laboratory 99 hours. Professor Krafska and Dr. Combs.

103. EMBRYOLOGY. This course covers maturation, fertilization, cell division, formation of the germ layers, development of external body form, histogenesis and organogenesis. Use is made of living and injected chick embryos, of pig embryos for dissection, and of serial sections of chick, rat and pig embryos. First year, second trimester, 6 hours a week, lectures 22 hours, laboratory 44 hours. Professor Krafska and Dr. Combs.

104. NEURO-ANATOMY. This course consists of the study of the gross and microscopic anatomy of the central nervous system, including the fiber tracts. The circulation of the brain and cord is also included. First year, second trimester, 7 hours a week, lectures 22 hours, laboratory 44 hours. Professors Kelly and Mettler.

105. BIBLIOGRAPHY. This is a course intended to acquaint first year students with the methods of referring to the literature and as practice in this work a subject is assigned for the writing of a paper. First year, first trimester, 1 hour a week, 11 hours. Professor Krafska.

201. TOPOGRAPHICAL ANATOMY. This consists of a study of surface and cross-section anatomy and embraces the study of sections made at all levels of the body. Sections of twelve levels are required to be drawn. Required of all second year students. Second year, third trimester, 9 hours a week, didactic 33 hours; laboratory (study and drawing) 66 hours. Professors Kelly and Mettler.

301. ADVANCED ANATOMY AND INVESTIGATION. To qualified students and graduates informal advanced courses in the different branches of anatomy are offered. Encouragement and opportunity are given to students and others who have sufficient preparation to undertake the investigation of original problems in anatomy. A reading knowledge of French and German is practically essential. Professors Kelly and Krafska.
CHEMISTRY

DR. CARLTON H. MARYOTT, Professor.
DR. WILLIAM R. BROWN, Assistant Professor.
MISS MARTHA WALKER, Assistant.

The work in chemistry necessitates as a prerequisite on the part of the student a familiarity with general inorganic chemistry, qualitative analysis and organic chemistry.

101. Quantitative Analysis. A knowledge of quantitative methods, particularly volumetric, is necessary for the proper performance of the work in physiological chemistry. The course consists primarily of laboratory work in which the important volumetric methods are studied. Sufficient practice is given the students for the attainment of accuracy in the procedure and familiarity with the calculations. First year, second trimester, 5 weeks, 6 hours a week, 30 hours. Professors Maryott and Brown and Miss Walker.

102. Physiological Chemistry. Prerequisite, Quantitative Analysis. In this course a study is made of the chemical composition and reactions of the carbohydrates, lipids, proteins, and other substances of biological interest. The various tissues and fluids of the body are covered, and considerable quantitative work is done on food, gastric juice, blood and urine. Nutrition and metabolism receive particular attention, and metabolism experiments are conducted by members of the class. Frequent references are made to current literature. First year, second trimester, 6 weeks, 6 hours a week; Third trimester, 15 hours a week, 201 hours. Professors Maryott and Brown, and Miss Walker.

103. Advanced Physiological Chemistry. This is a laboratory course for students, who, having had courses 101 and 102 or their equivalents, wish to continue further the study of biochemical methods. Among the methods studied are those for determining the hydrogen ion concentration of body fluids, the determination of calcium and magnesium cholesterol of the blood and the blood gases. Hours to be arranged. Professors Maryott and Brown.

In addition to the above courses, opportunity is given to qualified students to enter upon the investigation of new problems.
PHYSIOLOGY AND PHARMACOLOGY

Dr. W. F. Hamilton, Professor
Dr. R. A. Woodbury, Assistant Professor
Mr. Elkin Vogt, Instructor

101. PHYSIOLOGY. In the lectures of this course the object is to acquaint the student with the more fundamental concepts of physiology and to consider in detail those portions of the subject that are essential to an understanding of the phenomena of health and disease in man.

The laboratory exercises are planned to discipline the student in the method of experimentation as applied to the acquisition of physiological knowledge, and to give him first-hand experience with the principal types of experiment employed in the analysis of function. The work on cold blooded animals is held to the minimum necessary to establish elementary experimental technique. The more detailed experiments are performed on mammals and on the students themselves. It is the opinion of the department staff that fundamental scientific problems can best be emphasized in laboratory problems which are of obvious interest directly in terms of the students' ambition to become practical physicians.

Conferences and demonstrations supplement the more formal instruction. First year, third trimester, 20 hours a week, 220 hours. The Staff.

201. PHARMACOLOGY AND MATERIA MEDICA. Class room instruction in pharmacology has as one of its objectives the extending and re-inforcing of the knowledge of function laid down in the previous course of physiology. The second objective is to encourage the student to make these physiological principles the basis upon which to assemble carefully selected pharmacological data of such nature as to enable him to practice rational therapeutics later as a physician. Instruction in the purely physical or chemical properties of drugs is only to the extent of their direct bearing on pharmacology.

The department is in accord with the trend towards the limitation of drug therapy to observable beneficial effects. To this end the scope of drugs studied by the student is sharply curtailed. This affords an opportunity of acquiring that working knowledge of the modes of action of drugs so essential to their proper use. As a result, closer correlation is possible between this department and clinical instruction in the use of drugs, whether for diagnosis, prevention, or cure of diseases. The closer the correlation between these departments, the better is the student prepared to utilize drugs in practice. The elements of prescription writing are taught and each student acts as observer in the drug room for a limited time.

Experiments and demonstrations are carefully chosen as the basis of class room instruction. The scope of the laboratory exercises covers certain chemical and physical properties of drugs, and the important local and systemic effects of these drugs on the central nervous system, senses, respiratory tract, heart, circulation, digestive and genito-urinary tracts and skin. This laboratory work should encourage insistence upon controlled therapeutic results later when the student is engaged in clinical work as a physician.

Second year, first trimester, 18 hours a week, 198 hours. The Staff.
The laboratories are well equipped.

General pathology, general and special morbid anatomy and histology, are taught in a practical way. Aided by the necessary explanations and demonstrations the student himself is set to work. What he does is supervised. The courses come in the second year.

201. Autopsies. The autopsies are done in a specially equipped room adjacent to the morgue. The second-year class is required, and the third and fourth-year classes encouraged to attend. The Staff.

202. General Pathology, Morbid Anatomy and Histology. This is a course in the fundamental principles and processes of general pathology; the regressive changes, the progressive changes, including tumors, and inflammation. Because the study of pathology differs considerably from that of the other preclinical subjects, an attempt is made to conduct the course as an introduction into the clinical branches.

At the daily exercises a process is first explained and then illustrated by gross demonstration of selected specimens and by projection demonstration of microscopic slides. The specimens are then distributed for study. The student studies the specimen; then makes a drawing in the note-book; and also permanent notes descriptive of the process as a whole.

The student is taught to regard the structural changes not as the whole of pathology, but rather as examples and illustrations of the effects of morbid processes. Functional changes are explained in lectures and are stressed in the recitations.

The museum is well supplied with selected and attractively preserved specimens. The microscopic slides are loaned from a collection. Second year, first trimester, 15 hours a week, 165 hours. Professor Pund and Dr. Van Wagoner.

203. Special Pathology. A course in the diseases of the systems, including Gynecological Pathology and Neuropathology.

The plan of the work is the same as in the course in General Pathology, to which indeed this course is directly complementary. In addition, attention is given to surgical pathological diagnosis. Fresh surgical specimens are demonstrated to small groups, and the gross study is followed by individual microscopic study of selected specimens. The student is required to submit a written report describing in detail the morbid changes. The report is criticized by the instructor in conference with the student. Second year, second trimester, 15 hours a week, 165 hours. Professor Pund and Dr. Van Wagoner.
401. Clinical Pathological Conferences. In cooperation with the Clinical Departments of the Hospitals, conferences are held upon the cases which come to autopsy. That member of the fourth-year class to whom the case had been assigned in the hospital, presents the clinical history. The pathologist then demonstrates the autopsy material and attempts to explain the case as a whole. Fourth year, 1 hour a week, 33 hours. The Staff.

Encouragement and opportunity are offered to qualified students to follow advanced work and to a few graduates to learn the common methods of investigation employed in research in pathology.
BACTERIOLOGY AND PUBLIC HEALTH

Dr. Everett S. Sanderson, Professor.
Dr. Robert B. Dienst, Assistant Professor.
Dr. Eugene E. Murphey, Lecturer in Preventive Medicine.
Dr. H. Grady Callison, Health Commissioner, Richmond County Health Department, Lecturer in County Health Organization.
Dr. T. B. Phinizy, School Physician, Richmond County Health Department, Lecturer in School Hygiene.
Dr. Archie L. Haggerty, Chief, Milk and Food Division, Richmond County Health Department, Lecturer in Milk and Meat Inspection.
Dr. Fred L. Damren, Director of Laboratories, Richmond County Health Department, Lecturer in Public Health.
Mr. Harry Gordon, Registrar of Vital Statistics, Richmond County Health Department, Lecturer in Vital Statistics.

101. Public Health. An introductory course to Public Health. In addition to lectures, students will be assigned topics of a public health nature upon which they will be required to write a term paper. First year, first trimester, 1 hour a week, 11 hours. Dr. Damren.

201. Bacteriology and Immunology. The course is designed to familiarize students with the principles of general bacteriology, but with special emphasis on those organisms producing disease conditions in man, together with the application of measures for their control, and a discussion of the mechanism of infection and resistance. The disease producing properties of the commoner pathogenic bacteria, with methods for their cultivation, isolation and identification will be studied in the laboratory. The principal serologic methods of diagnosis will also be carried out. Second year, second trimester, 18 hours a week, 198 hours. Drs. Sanderson and Dienst.

301. Public Health. Field trips. The course is designed to familiarize students with modern health measures as exemplified in water purification, sewage disposal, mosquito control, dairy farm and milk plant sanitation, meat canneries and meat inspection, school hygiene, industrial hygiene, rural sanitation, diagnostic laboratory procedures, city, county, state, and federal health department organization, etc. The trips will be supplemented with lectures. Third year, first trimester, 4 hours a week, 44 hours. Drs. Sanderson, Dienst, Callison, and Haggerty.

302. Public Health. A series of lectures devoted to the historical development of public health and preventive medicine. Third year, third trimester, 3 hours a week, 33 hours. Dr. Murphey.
303. Public Health. Vital statistics. A series of lectures devoted to the theory of statistics, statistical methods, and the application of statistics to the field of public health. By the actual examination of hospital records, the students will be instructed as to the correct manner of filling out death certificates according to the accepted classification of the causes of death. Third year, third trimester, 1 hour a week, 11 hours. Mr. Gordon.

401. Public Health. School Hygiene. Students in small groups will make visits to the public schools of Richmond County. Instruction will be devoted to the detection of physical defects of school children, the interpretation of Schick and tuberculin tests, and the procedures employed in prophylactic immunization. Fourth year, groups of 6, first trimester, 4 hours a week, 12 hours. Courses not offered during 1934-35. Dr. Phinizy.

402. Public Health. Health Surveys. Elective. The opportunity to make a health survey will be given to those who desire to do so. Communities not larger than 10,000 to 20,000 population are to be preferred. A properly completed survey will give to the student an idea of actual community health conditions, deficiencies, health organization set-up, difficulties encountered in health administration, etc., as can be obtained in no other way. Offered to students in the third and fourth year. Hours to be arranged. Drs. Sanderson and Dienst.

The Department of Bacteriology and Public Health is equipped for research and offers to properly qualified undergraduate and graduate students opportunities to undertake original investigative work. Physicians and dentists who may be interested in some special problem may apply for space and materials.
MEDICINE

Dr. V. P. Sydenstricker, Professor.
Dr. W. J. Cranston, Clinical Professor.
Dr. W. R. Houston, Clinical Professor.
Dr. E. E. Murphey, Clinical Professor.
Dr. J. R. Garner, Visiting Clinical Professor.
Dr. J. H. Butler, Associate Clinical Professor.
Dr. H. G. Mealing, Assistant Professor.
Dr. A. A. Davidson, Assistant Clinical Professor.
Dr. A. A. Walden, Assistant Clinical Professor.
Dr. F. Lansing Lee, Clinical Associate.
Dr. Irvine Phinizy, Clinical Associate.
Dr. J. W. Brittingham, Clinical Instructor.
Dr. J. D. Gray, Clinical Instructor.
Dr. K. W. Milligan, Clinical Instructor.
Mr. F. C. McClure, Lecturer.
Dr. D. M. Wolfe, Clinical Assistant.
Dr. H. T. Harper, Jr., Fellow.
Dr. G. P. Vryonis, Fellow.

Instruction in physical diagnosis and clinical pathology is begun in the last trimester of the second year; both subjects are taught largely by demonstration and practical exercises. Throughout the third year advanced work in physical diagnosis is given using selected cases from the abundant material of the out-patient department. During this year a comprehensive survey of medicine is given by means of a recitation course based on a standard text. Therapeutics is emphasized. In the fourth year two hours a week are devoted to clinical lectures and demonstrations, the great bulk of instruction being carried on at the bedside.

201. Physical Diagnosis. Recitations, demonstrations and practical exercises, emphasis is laid on normal physical signs. Second year, third trimester, 8 hours a week, 88 hours. Dr. Sydenstricker and Staff.

202. Clinical Pathology. Lectures and practical exercises covering the field in this subject. Standard methods are taught. Beginning with examination of the urine and blood, the course is continued to include all the usual laboratory procedures, blood chemical determinations and clinical bacteriology. The hospital furnishes an abundant supply of material. The student carries out all the procedures. Second year, third trimester, 12 hours a week, 122 hours. Dr. Mealing and Assistants.

301. Medicine. A large part of general medicine is covered in this course in recitations based on a standard text. Diseases that are frequently seen in the clinics are not emphasized here. Third year, first and second trimesters, 3 hours a week, 66 hours. Dr. Lee.
302. **Clinical Medicine.** Practical instruction is given to small groups in the out-patient department, covering history taking, physical examination, diagnosis and treatment. The student is assigned a newly admitted patient, required to take a complete history and after examining the patient suggest therapy. All phases of this work are supervised. The follow-up of return cases is an important part of this work. Approximately 4,500 patients are admitted to the medical division of the out-patient department each year. Third year, 4 of class, 7\(\frac{1}{2}\) hours a week, 82\(\frac{1}{2}\) hours. Repeated each trimester. Drs. Sydenstricker, Davidson, Walden, Lee, Mealing, Phinizy, Gray, Harper and Vryonis.

303. **Therapeutics and Materia Medica.** A general course covering the necessary instruction in these subjects. Third year, first trimester, 5 hours a week; second trimester, 3 hours a week, 88 hours. Drs. Davidson and Walden.

304. **Clinical Endocrinology.** Elective. A survey of the clinical applications of results of experimental endocrinology. Third year, third trimester, 2 hours a week, 22 hours. Drs. Lee and Kelly.

305. **Ward Rounds.** Ward rounds for the third year class are conducted three times a week. Third year, 4 of class, 3 hours a week, 33 hours. Repeated each trimester. Drs. Butler, Brittingham and Armstrong.

401. **Lectures and Clinics.** These present in detail the most important therapeutic methods, particular attention is directed to psychotherapy. Fourth year, 1 hour a week, 33 hours. Dr. Houston.

402. **Medical Clinics.** Fourth year, 2 hours a week, 66 hours. Drs. Murphey and Sydenstricker.

403. **Medical Jurisprudence.** A lecture course on the more important phases of this subject. Fourth year, 1 hour each second week, 16 hours. Dr. Garner and Mr. McClure.

404. **Ward Rounds and Ward Work.** For a period of eleven weeks one-third of the fourth-year class is assigned to the medical wards as clinical clerks. Each patient entering the wards is assigned to a student who records the history and physical findings and carries out the routine laboratory procedures. The students are required to attend ward rounds with visiting physicians daily and make notes on the patients' progress and on the therapeutic measures employed. Fourth year, 3 of class, 5 hours a week, 55 hours. Repeated each trimester. Drs. Sydenstricker, Houston, Cranston, Butler and Phinizy.

405. **Domiciliary Medicine.** Elective. Under the supervision of the City Physicians fourth-year students attend the sick poor in their homes. History, physical examination and laboratory examinations are made and re-
corded and daily visits paid, each case being followed to its completion. There are daily conferences where the instructors meet the group of students and a history meeting is held once a week. One-third of the fourth-year class is assigned to this work for one trimester.  Dr. Lee.

406. Syphilis Clinic. Fourth year, \( \frac{1}{3} \) of class, 4 hours a week, 44 hours. Repeated each trimester.  Dr. Brittingham.

407. Diabetes Clinic. Fourth year, \( \frac{2}{3} \) of class, 1 hour a week, 11 hours. Repeated each trimester.  Dr. Gray.

408. Clinical Pathological Conference. Clinical and autopsy findings are compared and correlated. The histories and material are from the hospital. For scheduled hours see Pathology 401.

409. Medical Seminar. Elective. Electrocardiography. Fourth year, first trimester, 1 hour a week, 11 hours.  Dr. Brittingham.

410. Medical Seminar. Elective. Fourth year, second trimester, 2 hours a week, 22 hours.  Dr. Sydenstricker.
SUB-DEPARTMENT OF NEUROLOGY AND PSYCHIATRY

DR. W. J. CRANSTON, Clinical Professor.
DR. NEWDIGATE M. OWENSBY, Visiting Clinical Professor.
DR. Y. H. YARBOROUGH, Lecturer in Psychiatry.

301. Neurology. A recitation and lecture course on organic diseases of the nervous system. Grinker’s Text Book of Nervous Diseases forms the outline of the course and is supplemented by collateral reading. Third year, 1 hour a week, 33 hours. *Dr. Cranston.*

402. Psychiatry. A lecture and recitation course outlining the more important mental diseases, with clinical demonstrations and lectures by visiting psychiatrists. Sixteen lectures by Dr. Owensby. Four lectures by Dr. Y. H. Yarborough. The class spends two days at the Georgia State Hospital for the Insane, at Milledgeville, studying cases and attending clinics under the direction of the staff. Fourth year, 1 hour a week, 33 hours. *Dr. Cranston and Visiting Staff.*
A thorough understanding of what constitutes the normal baby and child is an essential, upon which the proper teaching of pediatrics should be based. Accordingly, instruction pertaining to the normal baby and child is stressed.

Preventive Pediatrics is taught to students as the ideal in the successful practice of pediatrics. With every ill child demonstrated in clinics, not only the pathological and clinical manifestations are considered, but also the preventive aspects of the case are emphasized.

Realizing that only by actual contact and proper study of sick children can the important diagnostic and therapeutic differences peculiar to this branch of medicine be mastered, the instruction throughout the fourth year is essentially practical.

301. During the first trimester in the third year the class is instructed on the development of the normal infant and physical diagnosis as applied to infants and children. Half of the time is spent in lectures and quizzes and the rest in actual examination of patients on the pediatric ward. Third year, first trimester, 2 hours a week, 22 hours. Dr. Burpee.

302. During the second trimester in the third year the class is instructed in infant feeding, nutritional disturbances and hygiene in infancy and childhood, and the more important diseases of infancy and childhood. Third year, second trimester, 2 hours a week, 22 hours. Dr. Burpee.

303. During the third trimester in the third year the study of the more important diseases of infancy and childhood, including the communicable diseases is continued. Third year, third trimester, 3 hours a week, 33 hours. Dr. Burpee.

304. Ward Rounds. The third year class is divided into three groups, each of which attends ward rounds twice weekly, for eleven weeks. Third year, ⅓ of class, 2 hours a week, 22 hours. Repeated each trimester. Drs. Harrell and McGahee.

401. Preventive Pediatrics. As a result of thorough organization and commendable cooperation between the Public Health Department, the Obstetrical Department, and the Pediatric Department, preventive pediatrics
receives its proper consideration. The Public Health Department with its excellent corps of district nurses, social workers, and the follow-up system, keeps the well-baby clinic abundantly supplied with excellent teaching material. The Obstetrical Department turns over to the Pediatric Department all babies born in the hospital as soon as the cord is tied. Also in its outpatient obstetrical service the babies are referred to the well-baby clinic as soon as it is practical.

By such cooperation between the different departments, the students are able to give prenatal advice, deliver the mother, attend the newly born, and later care for the baby during infancy in the well-baby clinic.

In this way the essentials of preventive pediatrics, such as maternal feeding, mixed feeding, artificial feeding, hygiene, administration of toxin-antitoxin, vaccination against typhoid and small-pox, are taught in a practical manner. Fourth-year students, in small groups, are required to attend. Fourth year, \( \frac{1}{2} \) of class, 1 hour a week, 11 hours. Repeated each trimester. Dr. Burpee.

402. Out-Patien Department. The students of the fourth-year class, in small sections, are required to work daily for a period of six weeks in the pediatric out-patient department for sick babies and children. The yearly attendance of patients in this department is well over two thousand. The students are taught to take histories, diagnose and treat the cases under the supervision of members of the pediatric staff. All varieties of children's diseases are seen and treated in this department. Cases of special interest are sent to the hospital, and are used as clinical material before the entire class. Fourth year, \( \frac{1}{2} \) of class, \( \frac{1}{2} \) of trimester, 5 hours a week, 28 hours. Repeated each trimester. Drs. Burpee, Harrell, F. X. Mulherin, McGahee and P. A. Mulherin.

403. Ward Work and Pediatric Clinics. During the fourth year the various acute and chronic diseases of infancy and childhood are taught in the pediatric wards of the University Hospital and the Wilhenford Children's Hospital. Cases are assigned to students to be worked up, and these cases are used later in clinics given before the entire class. Material is quite sufficient to demonstrate practically all of the diseases of infancy and childhood. No didactic lectures are given, all the work is clinical throughout the fourth year. The student sees practically all pediatric cases going through the Wilhenford Children's Hospital and the University Hospital. This gives the student opportunity to study diseases in the patient as well as in the textbook. Fourth year, 2 hours a week, throughout the entire year, 66 hours. Drs. Mulherin and Burpee.

405. Clinical Pathological Conference. This is held in conjunction with the departments of Medicine, Pathology and Surgery. For scheduled hours see Pathology 401.
The courses in surgery are arranged primarily to impart a knowledge of fundamental surgical principles and diagnosis. The first course, given at the end of the second year, serves to coordinate the information gained in the pre-clinical studies and the clinical surgical problems. In the third year, a balance is struck between didactic teaching and practical work in the out-patient department and in the laboratory. Third year students meet jointly with members of the fourth year class in general surgical clinics devoted primarily to diagnosis and treatment. In the fourth year, the student takes an active part in the diagnosis and treatment of cases assigned to him on the wards. He is privileged to assist at the operation on these patients, and undertakes under supervision some of the duties of post-operative care. In addition, he receives instruction in the various surgical specialties in the out-patient department.

The courses in the surgical sub-departments of orthopedic surgery, gynecology, urology, dermatology and oncology, ophthalmology and oto-laryngology, and roentgenology, are listed separately.

201. Introduction to Surgery. The purpose of this course is not only to point out through lectures, demonstrations and recitations the fundamental principles and practices of surgery, but also to serve as a bridge between the knowledge gained in the pre-clinical subjects and the application of this knowledge to the diagnosis and treatment of surgical conditions. The student is also given a systematic course in bandaging, splint making, and other minor surgical procedures. Second year, third trimester, 2 hours a week, 22 hours. Drs. Brock and Sherman.

301. Principles of Surgery. A lecture and recitation course in which the entire field of general surgery is covered in a systematic fashion, emphasis
being placed on diagnosis and treatment. Third year, 2 hours a week, entire year, 66 hours. Dr. Traylor.

302. Surgical Pathology. An attempt is made to correlate the second year course in pathology with surgery. Pathological material removed at operations is examined grossly and microscopically. Special stress is placed on fresh gross pathology. The student is taught to interpret the clinical course of a disease in the light of the pathological evidence. Third year, second trimester, 2 hours a week, 22 hours. Dr. Henry.

303. Surgical Anatomy. This is a course in surgical applied anatomy and is required of third year students. Third year, third trimester, 2 hours a week, 22 hours. Dr. Sherman.

304. Operative Surgery. This is a practical course intended to teach the essential principles of surgical technique. To this end stress is placed upon the careful performance of a few operations, rather than upon a superficial knowledge of numerous operative procedures. The students, in self-selected groups of four, perform standard routine operations on experimental animals under strict aseptic precautions. The preparation of the dressings and proper care of the animals and instruments are required. All operations are done under ether anesthesia. At the end of the course each student is expected to present a written report of all the operations which he has performed. Third year, 1/2 of class, 6 hours a week, 66 hours. Repeated each trimester. Drs. Sherman and Simpson.

305. Clinical Surgery. The out-patient department is used to instruct members of the third year class in the diagnosis and treatment of ambulatory surgical cases. Under the direct supervision of members of the surgical staff, the students examine patients and do many of the dressings. Frequently short clinics are held when interesting cases present themselves. Third year, 1/2 of class, 7 1/2 hours a week, 82 1/2 hours. Repeated each trimester. Drs. Brock, Sherman, Weeks, Williams and Simpson.

306. Endoscopy. An elective course dealing with the theory and practice of esophagoscopy and bronchoscopy. Third year, 1/3 of class, 1/2 trimester, 41/2 hours a week, 25 hours. Repeated each trimester. Dr. Levy.

307. Neuro Surgery. Lectures, clinics and demonstrations in the field of neuro surgery. Third year, third trimester, 1 hour a week, 11 hours. Dr. Crane.

340. Surgical Clinics. Members of the third and fourth year classes meet jointly once a week in order that cases may be presented for the benefit of both classes. The aim in this course is to treat thoroughly and intensively selected topics in surgery. The fourth year students are required to make two complete case investigations of selected patients which include history,
physical examination, laboratory reports, discussion (following "Study Outline"), nurse's charts, progress and treatment notes, consultations, anatomy, physiology, biochemistry, pathology, bacteriology, prognosis and abstracts of current literature. Third and fourth years, 1 hour a week, entire year, 33 hours. Dr. Brock.

401. Didactic Surgery. A text book assignment covering the cases presented at Surgical Clinics is made to members of the fourth year class and salient and pertinent questions with special emphasis on diagnosis and treatment are discussed. Fourth year, 1 hour a week, entire year, 33 hours. Dr. Brock.

402. Ward Rounds. The surgical group in the fourth year meets at the bedside of a patient for an informal discussion of the features presented by the case. Special topics of the disease relating to the underlying physiological pathology are stressed. Fourth year, ¼ of class, 5 hours a week, 55 hours. Repeated each trimester. Drs. Brock, Battey, Chaney, Rhodes and Sherman.

403. Clinical Clerkships. The students are assigned in sections to the surgical wards of the hospital for one-third of the year. They are required to make routine histories, physical examinations, laboratory tests, and in consultation with the staff, complete many of the necessary special examinations. In addition, the student has the opportunity to assist at the operation on any of the patients who have been assigned to him. In this instance he is expected to write the operative note and this report, after having been approved by the resident surgeon, is entered at the customary place in the history. Fourth year, ¼ of class each trimester. Surgical Staff.

404. Minor Surgery. Students have an opportunity to participate in the minor surgical procedures on patients who have been seen in the outpatient department. All this work is done in the operating rooms of the outpatient department under the direction of members of the staff. Fourth year, ¼ of class, ½ of trimester, 3 hours a week, 16½ hours. Repeated each trimester. Drs. Sherman and Weeks.

405. Accident Room Service. In order to make the accident room material available for teaching purposes, as well as to prepare the student for his duties as intern, each member of the surgical group in the fourth year is expected to spend one week in attendance in the accident room and to assist the resident surgical staff in their treatment of accident room cases. The hospital has provided special living quarters immediately adjacent to the accident rooms to facilitate this service. Resident and Attending Staffs.

406. Clinical Pathological Conference. One hour a week is set aside for the presentation of the clinical and pathological reports on necropsy material originating on the surgical wards. Students are assigned special topics which are pertinent to the case under discussion. For scheduled hours see Pathology 401.
407. Surgical Pathology. Elective. A course which permits the student to study fresh tissue pathology in the gross and with vital staining immediately following its removal. Fourth year, \( \frac{3}{4} \) of class, hours to be arranged. Repeated each trimester. Dr. Brock and Staff.

408. Anaesthesia. A course in gas-oxygen anaesthesia. The students will have the opportunity to study induction anaesthesia and to appreciate the advantages offered by compression with oxygen and carbon dioxide in those cases of insufficient ventilation. Elective. Fourth year, \( \frac{3}{4} \) of class, hours to be arranged. Repeated each trimester. Dr. C. R. Battey and Resident Staff.

409. Surgical Research. The facilities of the experimental surgical laboratory are available to any properly qualified individual who desires to carry on the investigation of a surgical problem. Drs. Brock and Sherman.
OPHTHALMOLOGY AND OTO-LARYNGOLOGY

Dr. James M. Hull, Clinical Professor.
Dr. C. I. Bryans, Clinical Professor.
Dr. S. J. Lewis, Associate Clinical Professor.
Dr. C. M. Kilpatrick, Clinical Assistant.
Dr. W. E. Matthews, Clinical Assistant.

301. Principles of Ophthalmology and Oto-Laryngology. Instruction in these branches is given by means of didactic lectures, clinical lectures and demonstrations. Diseases of the organs of special sense are taught in a systematic way, special attention being paid to pathology and diagnosis. This course appears in duplicate in the schedule for the 1934-35 session, in order to transfer it from the fourth to the third year. Fourth year, first and second trimesters, 1 hour a week, 22 hours. Third year, second and third trimesters, 1 hour a week, 22 hours. Drs. Hull, Bryans and Lewis.

402. Clinical. A continuous service in the out-patient department. Practical training in diagnosis and treatment of the diseases of the eye, ear, nose and throat. Instruction is given in the use of special diagnostic and therapeutic instruments. Fourth year, 1/6 of class, 1/2 of trimester, 5 hours a week, 27 1/2 hours. Repeated each trimester. Drs. Hull, Bryans, Lewis, Kilpatrick and Matthews.
ORTHOPAEDIC SURGERY

Dr. H. M. Michel, Clinical Professor.
Dr. H. N. Page, Associate Clinical Professor.
Dr. Peter B. Wright, Clinical Associate.
Dr. C. Goodrich Henry, Clinical Assistant.

301. Principles of Orthopaedic Surgery. A systematic lecture and recitation course covering the general field of orthopaedic surgery. Third year, second trimester, 2 hours a week, 22 hours. Drs. Michel, Page and Wright.

401. Clinical Orthopaedic Surgery. A clinical period every second Monday. This time is devoted to operative clinics, ward demonstrations and informal lectures. Fourth year, 1/6 of class, 2 hours each second week, 11 hours. Repeated each trimester. Drs. Michel, Page and Wright.

402. Clinical Out-Patient Orthopaedic Surgery. Under instructions of the Staff the student is taught diagnosis and treatment of ambulatory orthopaedic conditions. Fourth year, 1/6 of class, 1/2 of trimester, 1 hour a week, 5 1/2 hours. Repeated each trimester. Drs. Michel, Page, Wright and Henry.

403. Fractures. A didactic and practical demonstration course. The student is quizzed on the principles of fractures and cases are shown to illustrate the underlying pathology. Fourth year, entire class, 1 hour a week, 33 hours. Dr. Wright.

404. Fracture Clinic. A follow-up clinic for fractures. The usual methods of treatment are demonstrated and discussed. Fourth year, 1/6 of class, 1/2 of trimester, 1 hour a week, 5 1/2 hours. Repeated each trimester. Drs. Wright and Henry.
DERMATOLOGY AND ONCOLOGY

Dr. G. T. Bernard, Clinical Professor.
Dr. W. H. Roberts, Assistant Clinical Professor.
Dr. R. I. Bryson, Clinical Assistant.

301. Principles of Dermatology. Recitations based on a standard text-book in dermatology are held throughout the year. This course appears in duplicate in the schedule for the 1934–35 session, in order to transfer the course from the fourth to the third year. Third and fourth years, 1 hour a week, 33 hours. Dr. Bernard.

401. Clinical Dermatology. The dermatological clinic is attended by one third of the class during each trimester. Fourth year, \( \frac{1}{2} \) of class, 2 hours a week, 22 hours. Repeated each trimester. Drs. Bernard and Bryson.

402. Tumor Clinic. Opportunity is offered students to observe the method of diagnosis, treatment and follow-up of cancer cases. Fourth year, Monday, 10–12 a. m., throughout the year. Elective. Drs. Bernard and Roberts.
UROLOGY

Dr. J. R. Robertson, Assistant Clinical Professor.
Dr. G. W. Wright, Clinical Instructor.

301. Principles of Genito-Urinary Surgery. A systematic lecture and recitation course is given to cover fundamental principles in the general field of genito-urinary surgery. Third year, first and second trimesters, 1 hour a week, 22 hours. Dr. Wright.

401. Clinical Genito-Urinary Diseases. Practical training in the diagnosis and treatment of genito-urinary diseases including cystoscopy is given throughout the year in the out-patient department. Fourth year, ¼ of class, ½ of trimester, 6 hours a week, 33 hours. Repeated each trimester. Drs. Robertson and Wright.

402. Ward Rounds and Operative Clinics. This course is devoted to the discussion of the diagnosis and treatment of genito-urinary diseases and the demonstration of diagnostic procedures. The student has an opportunity to observe the removal of ureteral calculi by cystoscopic manipulation, litholapaxy under visualization, and the transurethral removal of bladder neck obstruction by electro-resection. The out-patient department and the free wards supply ample material for this work. Fourth year, ¼ of class, 2 hours each second week, 11 hours. Repeated each trimester. Dr. Robertson.
ROENTGENOLOGY

DR. L. P. HOLMES, Clinical Professor.

401. Roentgenology. Instruction is given in the underlying principles of X-Ray technique. The students are instructed in the roentgenological interpretation of a large number of practical cases, covering the field of roentgen diagnosis and a number of patients are shown under the fluoroscope, as a follow-up after the clinical diagnosis. Instruction is also given in the principles underlying roentgen therapy. Fourth year, \( \frac{3}{4} \text{ of class, 1 hour a week, 11 hours. Repeated each trimester. Dr. Holmes.} \)
GYNECOLOGY

Dr. W. H. Goodrich, Clinical Professor.
Dr. E. A. Wilcox, Associate Clinical Professor.
Dr. E. B. Woods, Assistant Professor.
Dr. M. Preston Agee, Clinical Associate.
Dr. John C. Wright, Clinical Associate.
Dr. W. J. Williams, Clinical Assistant.

The course has been arranged primarily to impart a fundamental knowledge of the pathology and of the principles of diagnosis and treatment in gynecology. It begins with a series of didactic lectures which are closely correlated to obstetrics, continuing throughout the third year. In the fourth year the student receives little didactic instruction, the greater emphasis being placed upon individual instruction. Ward rounds and operative clinics give him personal contact with the instructors, affording ample opportunity for consultation on the individual cases. His clinical knowledge is correlated with the underlying pathology through his instruction in gynecological pathology, and he is given the opportunity of becoming familiar with the major problems in gynecological literature through a seminar course in the third trimester of the fourth year.

301. PRINCIPLES OF GYNECOLOGY. A recitation and lecture course in the principles and practice of gynecology. Third year, 1 hour a week for the entire year, 33 hours. Dr. Woods.

401. ADVANCED GYNECOLOGY. It is the aim of this course to stress diagnostic problems, giving opportunity for review of the principles and practice of gynecology. Fourth year, first trimester, 1 hour a week, 11 hours. Dr. Wilcox.

402. WARD ROUNDS. Presentation of gynecological conditions both pre- and post-operatively, together with ample opportunity for the student to examine the patients. Fourth year, 1/3 of class, 1 hour a week, 11 hours. Repeated each trimester. Elective. Drs. Goodrich and Woods.

403. OPERATIVE GYNECOLOGY. This course allows the student to become familiar with the different operative procedures most common in gynecological surgery. One student is allowed to assist with each operation, the remainder of the group observing. Fourth year, 1/3 of class, 1 hour a week, 11 hours. Repeated each trimester. Drs. Goodrich, Wilcox, Agee and Wright.

404. GYNECOLOGICAL AND OBSTETRICAL PATHOLOGY. This course is designed to refresh the student’s knowledge of the surgical pathology attendant upon gynecological and obstetrical conditions. Lectures and demonstrations of gross and microscopic pathology will make up the course. Fourth year, second trimester, 1 hour a week, 11 hours. Elective. Drs. Wilcox and Woods.
405. **Gynecological Problems.** This course has been instituted in order that the individual student may have an opportunity to work upon some subject in gynecology which is particularly interesting to him. A term paper will be required of each student which will be a resume of recent literature upon some certain subject, and will be presented before the class as a whole. The discussion by the students will be guided by members of the staff. Fourth year, third trimester, 1 hour a week, 11 hours. Elective. *Drs. Goodrich, Wilcox, Woods, Agee and Wright.*

406. **Clinical Gynecology.** Opportunity is afforded the students for diagnosis and treatment of ambulatory gynecological conditions seen in the out-patient department. Fourth year, 1/6 of class, 1/2 of trimester, 4 1/2 hours a week, 25 hours. Repeated each trimester. *Drs. Woods, Agee, Wright and Williams.*
OBSTETRICS

Dr. Joseph Akerman, Professor.
Dr. Andrew J. Kilpatrick, Clinical Professor.
Dr. E. Bryant Woods, Assistant Professor.
Dr. John William Thurmond, Assistant Clinical Professor.

Instruction is both didactic and practical. It begins in the third year and extends throughout the third and fourth years. Starting in the third year with the physiology and management of normal pregnancy, parturition and puerperium, the student is gradually guided into the pathological conditions found in obstetrics. This study continues during the fourth year in lecture and clinic demonstration.

In the prenatal clinic the student has ample opportunity for study of normal and abnormal pregnancies. Manikin exercises together with opportunity of watching normal labor, and assisting with hospital deliveries complete the third year student's training. During the fourth year the students are assigned in pairs for the outside delivery service. This service has grown to such an extent that it affords ample opportunity for the study of normal and abnormal parturition. More than four hundred deliveries in the patients' homes are now attended by the students. The majority of these cases are seen in the prenatal clinic before delivery. Each student is required to attend fifteen cases as assistant and then to act as attendant in fifteen more.

301. Obstetrics. Lecture recitations and manikin demonstrations on the physiology of pregnancy and labor. Third year, 2 hours a week, 66 hours. Drs. Akerman and Woods.

302. Obstetrical Clerkship. During the third year each student is required to attend at least four women in confinement, starting with labor and attending through parturition and the puerperium. The student records his observations and is quizzed about each case. Drs. Akerman, Kilpatrick, Woods and the Resident Obstetrician.

303. Out-Patient Prenatal Clinic. Students in the third year class are divided into groups of six and are in attendance three afternoons per week for five and one-half weeks. Practice is afforded in history taking, abdominal examination and auscultation, and pelvimetry. Many pathological conditions are found and discussed. Third year, 1/6 of class, 1/2 of trimester, 4 1/2 hours a week, 25 hours. Drs. Akerman, Woods and Thurmond.

401. Lectures and Clinics on Pathological Obstetrics. Ward cases in the hospital are used for this course. Fourth year, 1 hour a week, 33 hours. Drs. Kilpatrick, Woods and Thurmond.
402. **Home Delivery Service.** For this course the fourth-year class is divided into pairs, each student being in attendance for thirty cases. For the first half of his term of service he acts as assistant to his predecessor and then delivers at least fifteen patients himself, preparing and submitting case histories and data for birth certificates for cases attended. *Drs. Akerman, Woods* and *Thurmond.*

403. **Operative Clinics.** Throughout the year arrangements are made whereby students are allowed to attend certain major operations. *Visiting and Resident Hospital Staff.*

ELECTIONS TO MEMBERSHIP IN ALPHA OMEGA ALPHA

Class of 1934
Elected during Third Year 1932-1933:
Franklin Pendergrass Holder, Jr.
Louis Pincus
Samuel Edgar Watson
Elected during Fourth Year 1933-1934:
Dan Arthur Jardine
Harry Edward McTyre
Andrew Kime Temples

Class of 1935
Elected during Third Year 1933-1934:
Milford Burriss Hatcher
Jacob Rubin
Jack McClellan Wright

REGISTER OF STUDENTS
