Those who receive the mantle of a rich and noble heritage are expected to perpetuate it.
For those who wear such a mantle and give it no sustenance it becomes but an empty echo out of the past. - WLS
EDITORIAL

Dr. Stewart's address to the graduating class of June is in this issue. It should be read thoughtfully and an attempt be made by each to perceive its important implications. In addition, one should make an effort to learn more facts about our origin by first hand reading.

In May 1831, two young French noblemen arrived in America ostensibly to study the prison system but actually they were here to study the American phenomenon—to see why it worked.

One of these young men was Alexis de Tocqueville. As a result of his study of all aspects of the political, legal and social organization of the country, he wrote the most perspicuous account of our country which was published in a book called "Democracy in America". The reader will be amply rewarded for it details in many ways the unique thing that we have here in America. This work is now published by
Vintage Books, Inc., in two volumes, the paper back editions of which are 95c a volume. In the reading of these volumes you will find that they are pertinent to and in tune with the theme of Dr. Stewart’s address. Many assets that we have are phenomenal. They exist no place else on earth. Many of the uneducated all over the world, and others educated within a limited horizon, simply are unable to believe that we have the material and spiritual wealth that we do have. We take many things for granted in a callous and often cynical manner. Actually many advantages under which we live were not obtained by us nor are they being perpetuated by us.

We too easily forget that the terrible agonies of yesterday produced the mechanisms for the comforts and freedoms of today.

Dr. Stewart has shown that the events that led to these often had their roots generations ago. It may be partly an accident of history that caused a rendezvous of time and geography with cumulative factors that crystallize into the phenomenon that is American Democracy.

One must always bear in mind that something which we may desire for our time may actually be an injudicious act that may cause the loss of some liberties in the next or future generations. What has been done and what is being done may either proscribe or unfetter the opportunities of the future.

One must draw more from the past and be careful not to borrow too much from the future for what we think are present needs. The very ability to mortgage the future for present desires may possibly breed public and political avariciousness and lead to material and spiritual bankruptcy in the future. Our society is no greater than the total greatness of the individuals that make it up.

To leave out the void of the future, there is another gulf in the affairs of men and this separates the past from the present. To neglect the past is to disregard a source of experience albeit poorly recorded and often, more often than we care to believe, distorted by political calumny.

Now the past is always with us, covertly or overtly affecting our actions. The effects of the past may be hurtful or helpful. To permit the past to dominate the present is to attempt to solve today’s problems with the compromises offered for the problems of yesterday. Each generation must conquer the past by study and learn to apply those
facts that are helpful in the solution of their own and problems of the future. For a complete knowledge of the compromises of yesterday may be used as a guide for a better compromise of today to ameliorate the all encompassing problems that seem to have us balanced impotently on the pivot of the uncertainties of the moment. (WLS)

My Dear Fellow Alumni:

It is a great privilege to send you greetings from the officers and members of the Board of Managers of the Alumni Association of the Medical College of Georgia.

We are all aware of your great loyalty and your keen interest in the affairs of M. C. of G. The Board of Managers will make every effort this year to keep you as completely informed as is possible. We welcome requests for speakers for your meetings, your letters of comment and criticisms, and your personal visits to the school.

This should be a year of great activity. With the expansion of the research facilities, the opening of the new Administration Building, the completion of the new State Hospital, the modifications of the curriculum, and the increase in faculty, there should be areas of interest for every alumnus.

The whole problem of education in America is undergoing very careful appraisal, and medical education is receiving particular analysis. During this period, our Alma Mater will require the complete loyalty and support of each of us and the very careful consideration of all the problems involved. I am sure that our organization will measure up to each new responsibility and on each occasion as may be required.

I am genuinely aware of the great responsibilities which are the Medical College of Georgia's, and in expressing my appreciation of the election as your president assure you of my earnest desire to make this a most successful year for our Alma Mater.

Sincerely yours,

William L. Barton, President
FACTS ABOUT THE SPEAKER

Dr. Joseph S. Stewart, a resident of Coconut Grove, Florida, attended the University of Georgia and graduated from the Medical College, class of 1918. During the first World War he was commissioned a First Lieutenant and was with the American Expeditionary Forces, spending nine months in France. After discharge, he remained abroad to do hospital work for the following three years. Then, after practicing medicine in Athens, Georgia, he went to Miami, Florida in January, 1926, where he has remained in practice ever since, limiting his practice to surgery.

In World War II Dr. Stewart entered the service as a Major and was promoted to Full Colonel when he was Division Surgeon, European Division, Air Transport Command. While in this position he was in charge of the air evacuation of the American wounded from Europe to the United States.

Dr. Stewart has been President of the Dade County Medical Association; President of the Florida Medical Association, and President of the Southeastern Surgical Congress. His membership in medical groups include a Fellow of the American College of Surgeons and of the International College of Surgeons and a member in good standing of his local, state and national medical societies.

Dr. Stewart’s present staff appointments include Attending Surgeon in charge of a Surgical Service at James M. Jackson Memorial Hospital,
Miami, Florida, as well as staff appointments at St. Francis, Mt. Sinai, Merey, Doctors and North Shore Hospitals.

THE HERITAGE OF AMERICANS

The true measurement of the enduring greatness of a nation is the character of its citizens.

That I believe. That thought is the theme of my address.

To the illustrious citizens who have gone before us, to the great patriots of America, we are indebted for what we are and what we have. To them we are indebted for our liberty, our country, our constitutional system of government, and for a political future which is unequaled by the citizens of any other nation.

For centuries men have written of a peoples’ heritage and of an individual’s obligation to his heritage. Nowhere have I found it more beautifully expressed than on the front page of the Proceedings of the Medical College of Georgia. “Those who wear the mantle of a rich and noble heritage are expected to perpetuate it. For those who wear such a mantle and give it no sustenance it becomes but an empty echo out of the past.”

Ladies and Gentlemen, you and I wear such a mantle for ours is a rich and noble heritage.

Men of Medicine, you have heard much of the heritage which has come to you from the great leaders in medicine. Of this I shall not speak; rather, let us dwell on an inheritance which is far greater, far more profound, and of an obligation that is as fundamental as life itself. It is of America I shall speak, of our country, of our system of government, and of our Constitution. It is here that you will find the greater heritage. It is here that you will find the responsibilities and the obligations of the American heritage!

When King John of England signed Magna Carta, “in the meadow which is called Runnemede, between Windsor and Staines, on the fifteenth day of June, 1215,” the American Constitution was born. We might say, that if the Constitution was here born, then it was conceived when the first man and the first woman came to live in the Garden of Eden. The Constitution is the consummation of the political thoughts and experiences of mankind from Adam to 1789. Be that as it may,
Magna Carta is one of the great milestones in the never-ending search of man for the ideal form of government.

There are other milestones along the long road of history—the First Charter of Virginia, 1606; the Mayflower Compact, 1620; the English Petition of Right, 1628, and the Bill of Rights, 1689. Second in importance to Magna Carta is the Bill of Rights, because it was a written instrument which, for the first time, clearly defined established the supremacy of a legislative body over a supreme ruler or king. These great documents have left their imprint not only on your daily life but on the lives of freedom loving men throughout the world.

As there have been great documents, so have there been great men, who have left their political thinking with these essays, so was John Adams of Massachusetts, Franklin, Jefferson, and Hamilton; so were they all, all of those American patriots who had a hand in fashioning the Declaration of Independence, who made up the Continental Congresses, and who wrote and signed the Constitution. These early Americans were students. Most of them had College Degrees. All had a long and valuable experience in government as it varied from colony to colony. This experience was fortified by a profound knowledge of the political essays of the great men of the past.

Who were the authors of these essays that so influenced our Constitution and our form of Government? Perhaps the three most influential were John Locke, Baron de Montesquieu and Thomas Paine. Though we mention a few, let us not forget the many who came before. Aristotle discussed Constitutional Government three hundred and fifty years before Christ. Cicero left his imprint in any discussion of the law of nature or natural law, and there were Hooker, Thomas Hobbs, Jean Rousseau, and many others.

Yes, your constitution is, indeed, a consummation of all the great political experiences that have gone before.

Soon after Parliament passed the English Bill of Rights (1689), John Locke published his Two Treatises on Civil Government. These treatises had a profound influence on Samuel Adams and, through him, on the Town of Boston and the American Revolution and thus, on you today.

From Montesquieu, the Frenchman, we learned of the different branches of Government: Legislative, Judicial, and Executive, and of checks and counter checks on each.
Of Thomas Paine, George Washington wrote, "My Countrymen—will come reluctantly into the idea of independence, but time and persecution bring many wonderful things to pass; and by private letters which I have lately received from Virginia, I find Thomas Paine's 'Common Sense' is working a powerful change there in the minds of many men." It is not unreasonable to assume that, after living for one hundred sixty-nine years under the sovereignty of the Crown, our forefathers might find it somewhat difficult to suddenly accept the idea of independence. A full year after being appointed Commander-in-Chief of the Colonial Forces, Washington said, "When I took command of the Army I abhorred the idea of independence; now I am convinced, nothing else will save us." To Paine then, we owe our thanks for teaching that the divine right of Kings and loyalty to royalty were things of the past.

With this background of education and experience in politics and government, the leaders of our thirteen colonies lived through and suffered the increasing indignities of the British Parliament and the insults from the despotic, stupid, stubborn, thick-headed George III, King of England. Yet, without that tyranny, without that stupidity, the American Constitution might never have been born. Men must be goaded into drastic action! Indeed, the American Revolution might not have been fought, and the artists would never have painted, "Washington Crossing The Delaware," nor, "The Surrender Of Cornwallis," pictures dear to you since your earliest years in school. Nor would the historian have written,—"the fiery zeal and brave resolve with which our fathers at last drew their swords, trampled in mire the banner of St. George and raised a new flag in the sight of the nations."

The Colonial leaders, members of the first and second Continental Congresses, were responsible for the Declaration of Independence, that famous document written by one of the greatest of them all, Thomas Jefferson. They were responsible for the Articles of Confederation. It was these students, these patriots, these great citizens, who were able to see the imperfections of their own handiwork, the Articles of Confederation. Recognizing these imperfections they felt the need for further deliberations and called the Constitutional Convention that met on the second Monday of May, 1787, in Philadelphia. Their deliberations at this Convention produced the greatest governmental document ever written by man, the American Constitution.

The convention delegates, for the most part young, educated, and necessarily property owners, represented the leaders of the day. Thomas Jefferson, John Adams and Thomas Paine had gone to Europe. Samuel
Adams and John Hancock were not appointed. Patrick Henry declined. Other than these few, nearly all the important men of the country were delegates. Though seventy-four delegates were appointed, a quorum was not reached until eleven days after the opening (a fact which might make us appreciate a little more our transportation system of today). It took four months to agree. Many were the compromises, many the debates. Finally the most controversial issues were agreed upon and purification was left to a committee of five. After eleven days the committee report was received and for the following five weeks, many hours each day, the convention discussed the report in detail, article by article, section by section. On September 13, the final document, signed by Gouvernor Morris, was handed to the convention and forty-eight hours later the signatures were affixed.

Your constitution was then a living thing; it had assumed form and body. All that was now necessary was ratification. The great Patrick Henry, he of “Liberty or Death” fame, was one of the leaders in the fight against ratification. He contested the very instrument which would do most to guarantee the liberty for which he cried. Why? Because he feared that the rights of individuals and of the states were endangered. Other “Old Patriots” of the Revolution, who were leading anti-federalists, were Richard Lee, Samuel Adams and George Mason. They represented small farmers and back country pioneers who had little power because of the property-holding and tax-paying qualifications for voting.

The citizens of this new country, which had only recently overthrown the sovereignty of the British crown, were jealous of their new found freedom. They feared the power of a federal or central government. And may I say, that we today, have learned that such fears are realistic and that we too, must fear and watch with much concern the ever-growing power of our Federal Government. But, these fears expressed by Patrick Henry, Richard Lee, and other “Old Patriots,” resulted in the promise of the Bill of Rights. Without that promise the Constitution would not have been ratified.

During the fall and winter of 1787-1788, the voters of the states chose delegates for their conventions. Delaware, the first to ratify, voted unanimously on December 7, 1787. New Jersey and Georgia were the only other states to ratify unanimously. Rhode Island was the last state to ratify. Her convention, in May, 1790, by a majority vote of 34 to 32, voted ratification, but not until Congress had threatened to deprive her of trade with the Union and several of her counties had threatened
secession. Thus, the last of the original thirteen states became a member of the United States of America.

These were the men, these the events, these the documents that are our heritage. Has man ever had more to be proud of? Has man ever had more to fight for, to strive for, to protect? Yet this is not all of our heritage; it is only a part, for to us belongs the heritage of all the great men and great events that have come to pass since George Washington took the oath of office as the first President of these United States.

Yours and mine is, indeed, a great and a noble heritage. Beware that we wear the mantle well.

I aver that the Constitution is a great and enduring document because the Americans who framed it were great citizens men, brave men, patriotic men. I aver that a document in itself is an inert thing, merely words printed on a page, that its life, its soul, its worth, is supplied by the men, the citizens, who support it, protect it, and enforce it. There is no document that has ever been written, or ever will be written, that will remain a thing of worth, a thing of reverence, unless the citizens who support it, the citizens to whom it is law, continue to be citizens of worth, of integrity and patriotism. Surely history has proved that a country is only as great and as strong as the citizens it represents. Let us never forget, that many countries have lived and become great but have now passed on into oblivion. Nor must we forget that a great price was paid for our liberty and a great price must be paid to preserve it.

Yes, ours is a great heritage, but it follows that ours is a great obligation and on our shoulders rests a great duty. That duty, Ladies and Gentlemen, is citizenship.

There is more to being a good citizen than being a good doctor. There is more to being a good citizen than being a good housewife, a good minister, a good carpenter. A good citizen must be a student not only of his own profession but of his government, local, state and national. Voting is the primary duty of citizenship and oh, how many of us fail to go to the polls! In this day of minority coercion in government, in this day of international tensions and cold war, it is evermore
important for the intelligent, thinking, patriotic citizens to use their influence, their suasion, and their voting power.

I must say to you, reluctantly and with sorrow, that far, far too many of us in medicine seem to forget that we are citizens with an obligation and a responsibility. The doctor's opinion is sought for and respected. He has many patients who, by precept, example, and suggestion, he can influence for the better. The doctor can be of great value to his community and to his country providing he is first a good citizen. Far too many of us have forgotten our great heritage, have forgotten the significance of the Revolutionary War, that struggle of, "imperishable grandeur."

Gentlemen, I beg of you, look on your community, your government, your country, your heritage, with great and deserved pride, but this pride must be nothing more than a background with which you must view the future of your community, and your country with a jealous eye, yes, a background of resolve to do your part as a citizen, that those who come after us may say that we, who live now, are a part of their heritage.

Gentlemen of the Graduating Class, you have seen that famous photograph of World War II of the marines raising the American flag on Suribachi. There, on that now famous Pacific Isle, Iwo Jima, lay 5,000 dead American men, there lay 16,000 wounded. It may never be your privilege to offer your life for your country, nor will it ever be your opportunity to raise a flag on Suribachi, it may never be your opportunity to participate in the formation of a great and lasting document, nor to write an essay which will live for the benefit of posterity. Such honors come only to the few, they are not necessary for you and for me. Your honor comes from citizenship, our reward from citizenship. If, as the winter time of life approaches, men can look at you and say, here was a great citizen and a fine doctor, then I say that you have worn the mantle well and your children and their children will receive the heritage which you, with honor, shall pass on to them.

The true measurement of the enduring greatness of a nation is the character of its citizens.

10
Dr. Peter Burum Wright, ’20, was installed as President of the Medical Association of Georgia at the annual convention held in Macon the first week of May. We, of MCG, feel very proud to have our Professor of Orthopaedic Surgery elected and installed into such an exalted office. During the years that he has been on the faculty of MCG he has contributed unstintingly of his time and his knowledge to the enlightenment of the students as well as to the meticulous care of his patients. His life has held many stumbling blocks which would have probably thwarted a lesser soul, but despite these pains and sorrow, he has managed to maintain that familiar smile which all who have known him realize is his ‘trademark’. Besides his professional abilities, which no one can question, his affability and his Chesterfield manners will definitely be an asset to the Medical Association of Georgia and we all feel sure that he will leave the association richer for having been its president.

To those of you who have been his students, there’s no need for an introduction, but there may be a great many of our alumni who were not so fortunate as to have had him as their professor of orthopaedics. “Pete”, as he is affectionately called by his friends and colleagues, is a native Augustan and was born here on December 20, 1896. His elementary education was received in the public schools of Augusta, but his secondary was at Porter Military Academy, Charleston, S. C. Later, he attended the University of Georgia and then received his M. D. from MCG in 1920. Only four years elapsed following his graduation from MCG when he was appointed to the faculty, and then in 1942, he was made Professor of Orthopaedic Surgery, an appointment he has held until the present time. In that same year, he was
made Chief of Orthopaedic Staff of the University Hospital. Besides his work with the Medical College and the University Hospital, he has also been a consultant in orthopaedics for the VA and Camp Gordon Hospitals in Augusta, Battey State Hospital for Tuberculosis at Rome, Georgia, the Georgia Railroad and the Southern Railway System. He is past president of the Georgia Orthopaedic Society.

Dr. Wright is a Diplomate of the American Board of Orthopaedic Surgery; a Fellow of the American College of Surgeons, the American Academy of Orthopaedic Surgeons, the Southeastern Surgical Congress, and the American Association for the Surgery of Trauma; member of the American Orthopaedic Association, and Alpha Omega Alpha. He is also a member of the Board of Governors of the American College of Surgeons and Chairman of the Committee on Trauma of the American College of Surgeons for the Southern states. He holds a honorary membership in the North Carolina, South Carolina and Florida Orthopaedic Associations. Besides the aforementioned professional memberships, he is on the Board of Trustees for Newberry College, a member of Pi Kappa Alpha and Phi Rho Sigma Medical Fraternity. In 1950, Dr. Wright was the recipient of the Gold Medal Award of the American Academy of Orthopaedic Surgeons which was granted for his exhibit on Paget’s Disease, an exhibit which was remarkable for its content and presentation of material. The reconstructed skeleton of a classical case of Paget’s Disease was the focal point of this exhibit which merited praise wherever it was shown.

THE "YOUNG ALUMNI AND ALUMNAE"

It is with pleasure that the PROCEEDINGS now introduces seventy-three neophytes to the older members of he Alumni Association. These new doctors will hold aloft their torch for healing, carrying into the highways and by-ways the knowledge and experience which they acquired at the Medical College of Georgia. May they always be a credit to their alma mater and remain as proud of her as she is today of them.

These MD’s of 1954 include:

James Frederick Adams, son of Dr. and Mrs. Fred Adams of Montezuma, Georgia. He received his undergraduate training at Emory University and while at MCG he was a member of Phi Rho Sigma, Alpha Omega Alpha and was on the staff of the CADAVER and the AESCULAPIAN. He is doing his internship at Charity Hospital, New Orleans, La.
Martin Alperin, son of Mr. and Mrs. Charles Alperin of Atlanta, Ga., received his undergraduate work at Penn State College and Emory University. He is a member of Phi Delta Epsilon and was on the staff of the AESCULAPIAN. He is interning at King's County Hospital, Brooklyn, N. Y.

John Daniel Bateman, son of Mr. and Mrs. Lee H. Bateman of Albany, Ga. attended Emory University prior to entering MCG. He was president of Phi Chi and a member of the Interfraternity Council, and is now interning at Charity Hospital in New Orleans.

Richard L. Benson, son of Mr. and Mrs. Hugh Lee Benson of Macon, Ga., did his undergraduate work at Mercer University. He is a member of Theta Kappa Psi and is interning at St. Mary's Hospital, Athens, Ga.

John Nelson Bickers, son of Mr. and Mrs. J. W. Bickers of White Plains, Ga., studied at the University of Georgia before coming to MCG. He is a Phi Rho Sigma and is now doing an internship at St. Louis City Hospital, St. Louis, Mo.

Charles Emory Bohler is the son of Mr. and Mrs. C. Outland Bohler of Statesboro, Ga. He is a graduate of the North Georgia College, University of Georgia and Georgia Teachers College and a member of Theta Kappa Psi. He is now interning at the Columbia Hospital of Richland County, Columbia, S. C.

David Louis Branch, son of Mrs. D. L. Branch of Tifton, Georgia, received his undergraduate training at the University of Georgia. He is a member of Theta Kappa Psi and is interning at the University Hospital, Augusta, Ga.

Dabney Hazelton Brannon is the son of Mr. and Mrs. L. Travis Brannon of Atlanta, Ga. He studied at Emory University before coming to MCG, and is a member of Alpha Kappa Kappa. He is doing his intern work at Grady Memorial Hospital, Atlanta, Ga.

Benjamin P. Bussey, son of Mr. and Mrs. P. W. Bussey of Cairo, Ga., attended the University of Georgia and while at MCG he joined the Phi Chi's. He is interning at Charity Hospital in New Orleans.

Henry Harper Butterworth, Jr., is the son of Mr. and Mrs. H. H. Butterworth of Atlanta, Ga. He attended Clemson College and Emory University. He is a member of Theta Kappa Psi and is interning at the Piedmont Hospital, Atlanta, Ga.
Gerald E. Caplan, son of Mr. and Mrs. Charles Caplan of Atlanta, Ga., received his undergraduate training at Emory University. He is a member of Phi Delta Epsilon and while at MCG was on the Interfraternity Council, was picture Editor of the AESCULAPIAN, feature Editor of the CADAVER, member of Alpha Omega Alpha, and was recipient of the first annual Cadaver Award for outstanding service to the Medical College of Georgia. He is now interning at Mount Sinai Hospital in Cleveland, Ohio.

Donald Carl Chait, son of Dr. and Mrs. George Chait of Atlanta, graduated from Duke University. He was business manager of the AESCULAPIAN and is a member of Phi Delta Epsilon. He is interning at the Michael Reese Hospital in Chicago, Ill.

Keith Elton Chapman is the son of Mr. and Mrs. Elton M. Chapman of Atlanta, Ga. He attended Springfield College and Louisiana State University. While at MCG, he was a member of the Honor Council and is an AKK. He is doing his intern work at the Los Angeles County General Hospital in Los Angeles, California.

Huddie Lee Cheney, son of Dr. and Mrs. H. P. Cheney of Cairo, Ga., attended Emory University and while at MCG was a member of the Student-Faculty Council. He is a Phi Chi and is interning at Grady Memorial Hospital in Atlanta.

Joseph T. Christmas is the son of the late George and Eddie Mae Christmas of Vienna, Georgia. He is a member of Theta Kappa Psi and Alpha Omega Alpha. He is now interning at the Macon City Hospital, Macon, Ga.

Hugh Lumpkin Coffee, son of Mr. and Mrs. Arthur L. Coffee of Eastman, Ga., received his undergraduate training at the University of Georgia. He is a member of Phi Rho Sigma and is now interning at DuPage Memorial Hospital in Elmhurst, Ill.

Grady Newton Coker, is the son of Dr. Grady N. Coker and Mrs. V. B. Coker of Canton, Ga. He studied at Emory University, is a member of Alpha Kappa Kappa and is now interning at the University Hospital, Augusta, Ga.

Alfred Lee Davis, son of Mr. and Mrs. Alfred L. Davis of Cave Springs, Ga., received his undergraduate training at the University of Georgia, Atlanta and Athens Divisions. He is a Theta Kappa Psi and is taking his internship at Duval Medical Center, Jacksonville, Florida.
William Anthony Dickson is the son of Mrs. W. J. Dickson of Nashville, Ga. He studied at Duke University and is an AKK. He is now interning at the Macon City Hospital, Macon.

William Robert Domingos, son of Mr. and Mrs. Robert B. Domingos of Macon, Ga., attended Duke University and the University of Georgia. He is a Phi Rho Sigma and taking his intern training at Walter Reed Army Hospital in Washington, D.C.

Augustus Baldwin Dudley, Jr., son of Mr. and Mrs. Augustus B. Dudley of Columbus, Ga., received his undergraduate training at the Citadel. He is an AKK and is interning at the Medical College of Virginia Hospital Division, Richmond, Va.

Leonard Clifton Durrence is the son of Mr. and Mrs. L. C. Durrence of Daisy, Ga. He attended the University of Georgia and is a member of Theta Kappa Psi. He is doing his internship at Athens General Hospital, Athens, Ga.

William Malcolm Eubanks, son of Mr. and Mrs. W. M. Eubanks of Augusta, Ga., received his undergraduate training at the University of Georgia. He is a Theta Kappa Psi and is now interning at the Georgia Baptist Hospital in Atlanta, Ga.

Leslie Andrew Fink is the son of the Rev. and Mrs. H. Fink of Augusta, Ga. He attended the Citadel, is a member of Phi Delta Epsilon and the Honor Council. He is doing his intern work at Beth Israel Hospital in New York City.

Richard Forrest Graves, son of the late Mr. and Mrs. B. H. Graves of Clarksville, Ga., attended the University of Georgia prior to entering MCG. He is a Theta Kappa Psi and is interning at St. Mary’s Hospital, Athens, Georgia.

Jackson Thomas Griffin, son of Mr. and Mrs. J. T. Griffin, Sr., of Montgomery, Ala., received his undergraduate training at Emory University. He is a Theta Kappa Psi and is interning at the University Hospital, Augusta, Ga.

Frank Dempsey Guillebeau, son of Mr. and Mrs. Frank Guillebeau of Lincolnton, Ga., studied at the University of Georgia. He is a member of Phi Rho Sigma and Alpha Omega Alpha, and is now interning at Grady Memorial Hospital in Atlanta, Ga.
Charles Ross Hatcher, Jr., son of Mr. Charles R. Hatcher of Attapulgus, Ga., took his undergraduate work at the University of Georgia. He is a member of Phi Rho Sigma and Alpha Omega Alpha, and is now interning at the Johns Hopkins Hospital in Baltimore, Md.

Haskell M. Heller is the son of Mrs. Doris Heller of Savannah, Ga., and attended Armstrong College in Savannah, and Emory University. While at MCG, he was a member of the Interfraternity Council and is a Phi Delta Epsilon. He is doing his internship at Mount Sinai Hospital in Cleveland, Ohio.

John Munn Heng and Julia Marie Heng are the son and daughter of Mr. and Mrs. Chew Do Heng of Augusta, Georgia. John received his undergraduate training at Emory University, while Marie attended Agnes Scott College, Atlanta. John is a member of Alpha Omega Alpha and Marie belongs to Alpha Epsilon Iota and was on the business staff of the AESCULAPIAN while at MCG. He is interning at the Philadelphia General Hospital and she is now at the Los Angeles County Hospital, Los Angeles, California.

Albert Robert Howard, son of Mr. and Mrs. J. Henry Howard of Sylvania, Ga., attended the University of Georgia, Mercer University and Georgia Teachers College. He is a Theta Kappa Psi and is doing his internship at Athens General Hospital, Athens, Ga.

Donald Edward Hubbard, son of Mrs. Roy Hubbard of Atlanta, Georgia, received his undergraduate training at Emory University. He is a Theta Kappa Psi and is doing his internship at Piedmont Hospital in Atlanta.

Kenneth H. Hyatt is the son of Mrs. Leona Gladstone of Augusta, Ga. Prior to coming to the MCG, he attended the Citadel. He is a member of Theta Kappa Psi and is now interning at the Philadelphia General Hospital in Philadelphia.

William Burton Johnston, son of Mr. and Mrs. Robert H. Johnston of Columbus, Ga., studied at Emory University and while at the MCG was a member of the Interfraternity Council. He is an AKK and is interning at the Medical College of Virginia Hospital in Richmond.

Robert Thomas Jones, son of Mr. and Mrs. R. B. Jones of LaFayette, Ga., took his undergraduate work at Georgia Tech and the University of Chattanooga. He is a member of Theta Kappa Psi and is now at the Macon Hospital in Macon, Ga., where he is doing his internship.
Joseph Katz is the son of Mr. and Mrs. Morris Katz of Augusta, Georgia. He attended the University of South Carolina and while at MCG, he joined Phi Delta Epsilon. His internship is being taken at DePaul Hospital in Norfolk, Virginia.

James F. Kirkpatrick, Jr., son of Mrs. J. F. Kirkpatrick of Augusta, Ga., attended the University of Georgia, Athens and Atlanta Divisions. He was President of the student body 1953-1954 and is a member of Theta Kappa Psi. He is now interning at Georgia Baptist Hospital in Atlanta.

Elmer Lawrence Kruger, son of Mr. and Mrs. E. L. Kruger of Denver, Colorado, received his undergraduate training at the University of Minnesota and the University of Georgia. He is a member of Theta Kappa Psi and is interning at the Swedish Hospital in Minneapolis, Minn.

Harold Joseph Lefkoff, son of Mr. Morris Lefkoff and the late Mrs. Lefkoff of Atlanta, Georgia, attended the University of Georgia and is now interning at the Georgia Baptist hospital in Atlanta.

William Frederick Lindsey is the son of Mr. and Mrs. W. R. Lindsey of Lenox, Georgia. He attended Emory University and while at MCG was a member of the Student-Faculty Council. He is a Theta Kappa Psi and is interning at the Columbia Hospital of Richland County in Columbia, S. C.

LaMar Scott McGinnis, Jr., son of Mr. and Mrs. LaMar S. McGinnis, Sr., of Athens, Georgia, received his undergraduate training at the University of Georgia. He was a member of the Interfraternity Council, President of Phi Rho Sigma, Secretary-Treasurer of Alpha Omega Alpha, and Chairman of the Honor Council. He is taking his internship at the Royal Victoria Hospital in Montreal, Canada.

John Roland McKinney is the son of Mr. and Mrs. D. D. McKinney of Gainesville, Ga. He attended the College of Charleston, S. C. and the University of Georgia. He is an AKK and is interning at the University Hospital in Augusta, Ga.

John Gray Madry, son of Mr. and Mrs. J. G. Madry of Atlanta, Georgia attended Georgia Tech, Emory University and received his A. B. degree from the University of Georgia. While at MCG, he was on the staff of "The Aesculapian" and is a member of Phi Chi Fraternity. He is taking his internship at Georgia Baptist Hospital in Atlanta, Ga.
George T. Mims, Jr. received his pre-med at Georgia Southwestern College and the University of Georgia. He is the son of Mr. and Mrs. Geo. T. Mims, Sr. of Plains, Georgia, a member of Theta Kappa Psi and Alpha Omega Alpha, and is interning at St. Louis City Hospital, St. Louis, Mo.

Diskin G. Morgan, whose parents, Mr. and Mrs. Perry W. Morgan reside in Augusta, Ga., attended the University in Athens. He is a member of Theta Kappa Psi and is presently interning at Macon Hospital in Macon, Ga.
