## Dr. Tedesco named president

Toni Baker

Dr. Francis J. Tedesco, interim dean of the Medical College of Georgia School of Medicine, has been selected as the sixth president of MCG.

Dr. Tedesco takes office July 1.

Dr. Judson C. Hickey, founding dean of the MCG School of Dentistry, has been acting president since July 1, 1987, when Dr. Jesse L. Steinfeld stepped down as president. Dr. Hickey will retire June 30.

The University System of Georgia Board of Regents announced Dr. Tedesco's appointment at its May 11 meeting.

Dr. Tedesco was recommended by Dr. H. Dean Propst, chancellor of the regents' presidential selection committee.

"I am excited and honored to have been selected by the Board of Regents to lead the Medical College of Georgia," Dr. Tedesco said. "I look forward to working with the faculty and the Board of Regents in maximizing the potential of this strong institu-

tion as it faces the challenges and opportunities of the future."

In a memo to the faculty, Dr. Propst wrote, "The choice of Dr. Tedesco culminates a nationwide search conducted by the regents' presidential selection committee, chaired by Regent Joseph D. Greene, and a presidential selection advisory committee chaired by Dr. J. Malcolm Kling, professor of pharmacology and toxicology and director of the Office of Research Support Services.

"The selection process was very thorough and very thoughtful and was conducted with the view of identifying the individual with those leadership qualities necessary to give effective direction to the university system's only health sciences university.

"The Medical College of Georgia is a key unit in the university system.

Its accomplishments have been extraordinary. Its potential is even more extraordinary.

"Fran Tedesco will bring to the position of president of the Medical College of Georgia outstanding academic credentials, valuable experience and, perhaps most importantly, a sense of humaneness that will serve him well in his new position. He alone cannot bring the Medical College of Georgia to true greatness. He will require not only your support, but also your best counsel as he directs the affairs of the Medical College of Georgia," Dr. Propst wrote.

Dr. Tedesco is a cum laude graduate of St. Louis University School of Medicine in St. Louis, Mo. He did his internship and residency in

medicine at Hospital of the University of Pennsylvania in Philadelphia.

He then completed a two-year fellowship in gastroenterology at Washington University School of Medicine in St. Louis.

He was named assistant professor of medicine at Washington University School of Medicine in 1974 and a year later was made assistant professor at the University of Miami School of Medicine. In 1977, he was promoted to associate professor at Miami.

Dr. Tedesco came to MCG in 1978 as associate professor and chief of the section of gastroenterology. He was made professor in 1981.

Dr. Tedesco became vice president for clinical activities at MCG in 1984 and interim dean of the School of Medicine in 1986.

Dr. Francis J. Tedesco

## Dr. Volpitto dies at age 82

Dr. Perry Paul Volpitto, professor emeritus and a retired chairman of anesthesiology at the Medical College of Georgia, died April 29 at age 82.

Dr. Volpitto, a native of Cherignola, Foggia, Italy, earned a medical degree in 1933 from Case Western Reserve School of Medicine in Cleveland.

He joined the MCG faculty in 1937 as chairman of anesthesiology. In 1938, he established the first residency training program for anesthesiologists in the South at University Hospital. He served as professor and chairman of anesthesiology until his retirement in 1973.

He received the 1984 Distinguished Service Award of the American Society of Anesthesiologists. He was former president of the association and of the Association of University Anesthetists, the Southern Society of Anesthesiologists, the Georgia Society of Anesthesiologists and the Richmond County Medical Society.

Survivors include his wife, Mary Stevens Volpitto; two sons, Perry Paul Volpitto Jr., and Dr. George

Dr. Perry Volpitto

David Volpitto, both of Augusta; and a daughter, Mary Ann Fulcher of Louisville, Ky.

## Telethon slated for June 4-5

Christine Deriso

The Medical College of Georgia will participate for the third consecutive year in the Children's Miracle Network Telethon. The 21-hour international event will air live from Disneyland in Anaheim, Calif., Walt Disney World in Orlando, Fla., and Tokyo Disneyland from 9 p.m. June 4 to 6 p.m. June 5 on WAGT (Channel 26) in Augusta.

The MCG Children's Medical Center, a 90-bed tertiary care and referral facility, is among the 160 children's hospitals and children's medical centers to benefit. Proceeds from the following counties will benefit MCG: Richmond, Columbia, Burke, Jenkins, Screven, Emanuel, Johnson, Washington, Jefferson, Glascock, Warren, Taliaferro, Wilkes, McDuffie and Lincoln in

Georgia; and Aiken, Edgefield, McCormick, Saluda, Barnwell, Bamberg and Allendale in South Carolina.

The five-year-old telethon is the largest television fund-raising event in the history of telethons. It has raised \$110 million altogether and \$41 million in 1987. Locally, \$202,010 was raised in 1987.

The telethon will feature more than 100 television, recording, movie and sports personalities, including Bob Hope, Marie Osmond, John Schneider, Merlin Olsen, Marilyn McCoo, Mary Hart, Rich Little, Jim McMahon and Malcolm-Jamal Warner.

A video featuring MCG patient Anthony Williams will be broadcast twice nationally during the telethon. The video, produced by MCG news bureau coordinator Toni Baker and W. Thomas Green Jr., chief of the

MCG Department of Television Services, documents the care 4-year-old Anthony received at MCG after accidentally shooting himself. It will air between midnight and 12:40 a.m. and between 4 p.m. and 4:40 p.m. June 5.

Anthony, his parents, Michael and Brenda Williams, and his brother, Chance, will be featured live from Disneyland during the telethon.

Seven other videos featuring MCG pediatric patients will be aired locally during the telethon. And for the first year, local segments will include live remotes from the MCG Children's Medical Center.

Local segments will be hosted by Lee Sheridan, vice president and station manager of Augusta's WAGT TV (Channel 26); Marion White, fashion director of J.B. White; and Don McNeill, a disk jockey for Augusta radio station WZNY (Sunny 105).

## Homecoming '88, Pages 9-11

# Dr. Tedesco plotting MCG's path

Toni Baker

The new president of the Medical College of Georgia has a vision he'd like every Georgian to share.

"I would like people, when they think about the medical college, for a scene to flash in their minds of outstanding investigators, outstanding physicians, outstanding clinicians and the name MCG to be a household item," Dr. Francis J. Tedesco said in a news conference May 12.

The same search process that found Dr. Tedesco also found that MCG is a well-kept secret.

Dr. Tedesco said it's the president's job to help change that.

He looks toward this and other responsibilities with excitement and optimism.

"MCG already is on the move," he said. "We have a master plan that is a framework for the achievement of excellence.

"As a part of that plan, we will be seeking further legislative support for an ambulatory care center and a specialized care center, both of which are critical to the fulfillment of MCG's educational and clinical care missions in a changing health care environment," he said.

Changes in health care include increased outpatient services and hospitalized patients' need of more intensive care.

"The proposed new facilities are a

part of MCG's response to these changes," Dr. Tedesco said. "After the specialized care and ambulatory care centers, the next highest priority for clinical care facilities is the children's medical center."

MCG also is in the midst of selecting deans for the schools of Allied Health Sciences, Dentistry and Medicine. "I want to make MCG attractive to strong, well-qualified candidates who want to become part of a management team committed to academic excellence," he said.

He noted that searches already are under way for the deans and he plans to at least have candidates invited to campus by the end of July.

Dr. Tedesco is confident because of the strong student body and faculty that already exist.

"Another major reason I am optimistic about MCG's future is that the Board of Regents, the General Assembly and the governor have enthusiastically endorsed the concepts and goals of the special funding initiative. This demonstrates the strong commitment of the state of Georgia to higher education. MCG will be a strong component and a leader in this effort," he said.

Dr. Tedesco stressed that research is the key to the future, essential to the improvement of health care and to the training of competent, up-to-date practitioners.

"MCG must continue to improve its ability to compete on a national level in research. I believe we have laid the groundwork and we now face a window of opportunity to maximize this competitive position in attracting both government and corporate research and development dollars.

"My commitment to teaching and clinical care is equally as strong, but

we must enhance and expand our research mission if MCG is to become preeminent among southeastern institutions of higher education," Dr. Tedesco said.

"MCG has been very successful as a teaching institution. Our graduates are known as competent and caring health care providers who will be lifelong learners. But we need to critically reevaluate our curriculum, enhance our computer literacy and expand our interactive computer learning," he said.

"It is, however, our clinical care mission which sets MCG apart from other institutions in the university system. It's our strongest link to the largest number of citizens of Georgia and it will remain a high priority at the Medical College of Georgia.

"We will critically review our current programs, define areas which we must develop and we will set priorities.

"Once we set our priorities, we will reallocate current resources, seek additional resources and we will pro-

ceed. There will be sacrifices, but we will not sacrifice quality," he said.

"I am confident that the unrealized potential of the Medical College of Georgia is going to be realized under President Tedesco's leadership," commented Dr. H. Dean Propst, chancellor of the University System of Georgia Board of Regents.

"I am confident that we are going to be able to form in this state a full working partnership among the four university level institutions that will benefit the state immensely," he said.

Dr. Tedesco cautioned that his vision would not be realized overnight.

"People at times get impatient and seek immediate changes and results. In academics, it is slower. You can't build a prestigious institution in 1,000 days or in five years," he said.

"It may take 10 to 15 years to achieve the preeminence we seek. I am committed to this goal; and with the support and counsel of the faculty, the chancellor and the Board of Regents, the dream will become a reality."

## Drawings are more than meets the eye

Gwen Corinth

There's more to Bill Stenstrom's illustrations than meets the eye.

Mr. Stenstrom's drawings of the peripheral retina represent more than 35 years of study and research. But few people recognize that medical illustrators conduct research and actually make scientific contributions, he says.

"We have the reputation of just making lovely illustrations, but we do much more than that," said Mr. Stenstrom, chairman of the Medical College of Georgia Department of Medical Illustration.

Mr. Stenstrom will discuss "Research and the Medical Illustrator" May 27 in Room 108 of the Robert B. Greenblatt, M.D., Memorial Library. The lecture, which will include a few of his innovations developed over the years, begins at 4:30 p.m. after refreshments at 4 p.m. The lecture is the last of this year's series, MCG Research Reports, sponsored by the School of Graduate Studies and open to the

public.

The link between medical illustration and scientific research is as old as the profession, Mr. Stenstrom said. Two of the fathers of medical illustration, Leonardo da Vinci and Andreas Vesalius, were also anatomists who made many discoveries through their dissection of cadavers.

During a career that began at Massachusetts General Hospital and Harvard University's Department of Ophthalmology, Mr. Stenstrom has developed new photographic and artistic techniques for illustrating the retina. He was first to make motion pictures of the peripheral retina viewed through an indirect ophthalmoscope, used to examine the interior of the eye.

Medical illustrators may notice anatomical features that a doctor misses because the two have different points of view, Mr. Stenstrom said.

"In Boston when I was examining retinal patients, I would see things ophthalmologists didn't see," he said. "It was perhaps because I was looking at color relationships."

# Graduation scheduled June 4

Medical College of Georgia graduation will be held June 4 at 2 p.m. in the Augusta-Richmond County Civic Center. Dr. Noah Langdale, president of Georgia State University in Atlanta, will deliver a keynote address.

The School of Medicine will host a reception in honor of the class of 1988 immediately after graduation at the Old Medical College on Telfair Street.

All five schools also will hold year-end ceremonies.

The School of Allied Health

Sciences will hold an honors ceremony June 4 at 10:30 a.m. in the MCG Auditoria Center's large auditorium.

The School of Dentistry will hold a hooding ceremony June 4 at 10 a.m. at Trinity on the Hill United Methodist Church in Augusta.

The School of Graduate Studies will hold a breakfast and hooding ceremony June 4 from 8-10 p.m. at Augusta's Pear Tree Restaurant.

The School of Medicine will hold a hooding ceremony June 3 at 2 p.m. at

First Baptist Church in Augusta. Dr. Edward J. Stemmler, executive vice president and dean of the University of Pennsylvania Medical Center and past chairman of the American Association of Medical Colleges, will be the keynote speaker.

The School of Nursing will hold a pinning ceremony June 3 at 7 p.m. at Curtis Baptist Church in Augusta. Dr. Joyce Billue, assistant professor in the school's Department of Adult Nursing, will be the guest speaker.

## Med school faculty assembly set

The Medical College of Georgia School of Medicine Spring Faculty Assembly will be held May 31 at 4 p.m. in the School of Dentistry auditorium.

Dr. Francis J. Tedesco, interim dean of the School of Medicine, will give the annual state of the school ad-

dress entitled, "Changing Times, Changing Needs, Changing Expectations."

Dr. Tedesco becomes president of MCG July 1. He has been interim dean since 1986 and vice president for clinical affairs since 1984. He also is

professor of medicine and chief of the section of gastroenterology.

Several faculty awards will be presented at the assembly, including educator of the year, the outstanding young faculty awards and distinguished faculty awards.

## GeorgiaCare cards to be mailed soon

### Karin Calloway

About 500 Medical College of Georgia employees have enrolled so far in GeorgiaCare, a supplement to MCG's Blue Cross/Blue Shield insurance program.

Of that number, 387 have never been treated at any of the three MCG facilities offering GeorgiaCare benefits, according to GeorgiaCare coordinator Jan Menger. Those facilities are the MCG Hospital and Clinics, the MCG Family Practice Center and the Physicians Practice Group Diagnostic Clinic.

"This is a really positive response," Mrs. Menger said. "One of our goals in the program is to encourage our employees to use our facilities in meeting their health care needs. Through GeorgiaCare, they can do so at a discount."

The cards are being made and should be sent to respondents shortly. Cards also will be sent to some 1,200 employees who used the MCG facilities in the past year, making them automatically enrolled in the program.

Employees may take advantage of the GeorgiaCare discounts before they receive their cards, Mrs. Menger said. "Simply tell the admissions representative or appointment operator that you're a GeorgiaCare member," she said.

GeorgiaCare applies to Blue Cross/Blue Shield covered expenses, which do not include routine physicals, routine eye exams, routine gynecological exams, well baby visits

and routine immunizations. Visits of this type may, however, be used toward meeting the annual deductible. "Employees with questions about covered expenses can consult their insurance plan booklet which gives guidelines," she said.

Employees with questions about GeorgiaCare may call Mrs. Menger at ext. 6039. She also is available to discuss the program at departmental meetings. Applications are still being accepted.

# Self-study to open new doors

**Toni Baker**

The American consumer of education has become more educated.

In the last dozen years, the Commission on Colleges of the Southern Association of Colleges and Schools (SACS) has witnessed the growth.

"People invest not just money, but time, energy and effort," said Dr. Charles R. Nash, SACS's associate executive director.

"They should have some assurances that what they are participating in is worth it."

So the Decatur, Ga.-based office is getting more telephone calls these

days from students and their parents wanting to know if a school is accredited and in good standing with the recognized accrediting body for 11 southern states.

The Medical College of Georgia recently embarked on a massive two-year institutional self-study as part of accreditation by SACS in which faculty will determine how well the school is meeting its missions.

"I think (the self review) does provide the opportunity for the institution to understand where it is," Dr. Nash said. "The institution, I think, does indeed need to know whether it is living up to the expectations that it has developed for itself or that the state

has established for it," he said.

"All institutions have goals, mission statements, objectives and so forth. One of the fundamental questions answered by the self-study process and the accreditation process, in general, is whether the institution is indeed doing what it reports to do.

"Your institution is about the development of people in the health professions," he said. "You are developing people that have not only certain kinds of attributes, but they know certain kinds of things. They have certain skills as dentists and nurses. The question becomes, does this institution do that job well?" Dr. Nash said.

The answer will come from the

study, which encompasses all five schools at MCG and, later, from an objective peer review of the study.

The self-study should take about 24 months to complete. The subsequent peer review will validate the self-study and determine whether the institution meets criteria for accreditation, Dr. Nash said. Peer review participants will be representatives from like institutions in other states.

"About a year from now, I will be talking with these folks about the composition of that (peer review) committee," Dr. Nash said of members of the self-study steering committee at MCG. Dr. William Weston, professor of pediatrics, chairs that committee.

"If this institution does not do an effective self-study, then the peer review is going to be very, very shallow," Dr. Nash said. "But if there's been an effective self-study done, then the peer review really takes on much more meaning."

He said most schools do a good — but not outstanding — job of looking at themselves. Some schools have been asked to redo portions of the study.

Schools that do the best view the assessment as an opportunity rather than a chore, he said. "This is not going to be easy. It will draw on (the committee's) energy and resources for a good three years easy and then beyond that," he said.

## Dr. Bailey named president of association

Dr. Joseph P. Bailey Jr., rheumatologist and Charbonnier professor of medicine at the Medical College of Georgia, has been installed as the 132nd president of the Medical Association of Georgia.

Dr. Bailey was installed at the association's annual meeting held in Savannah April 28-May 1. The association represents more than 7,000 Georgia physicians.

As president, Dr. Bailey stressed the need to preserve unity in the medical profession and promote healthy lifestyle choices among Georgians.

"In view of the many restrictions on medical care which have developed over the years, such as cuts in government spending, adverse changes in Medicare law, a hostile liability environment and increased competition in the medical arena, we are faced with a harmful divisiveness in the medical profession," he said.

"In addition, we are threatened with the possibility of a lower standard of medical care and a serious lack of availability for those who need it most.

"Physicians are under a tremendous amount of pressure from various

sources to deliver expedient, cost-efficient medical care, yet this often puts physicians in a position which could potentially lead to a reduction in quality of care.

"Physicians in their role as patient advocates must create a balance between the quality of care provided and the numerous restrictive measures placed upon them. It is crucial that members of the medical profession work together to improve the climate of medical care in this state," Dr. Bailey said.

He said the association is in the midst of implementing a statewide effort to educate Georgians about healthy lifestyles.

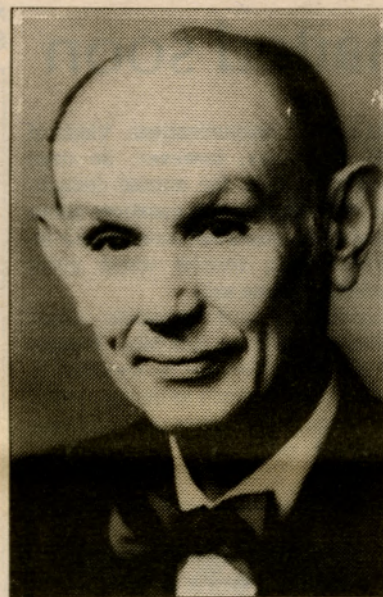

"Through the use of public service announcements, school videos, brochures and health events, we will be stressing the need for exercise, good nutrition and weight control, while condemning the serious effects of tobacco, alcohol and drugs. We will also continue to educate Georgians on the danger of AIDS and how to prevent contracting the disease," he said.

Dr. Bailey is a 1955 graduate of MCG. He has been on the MCG faculty since 1961 and chief of

and Gynecology Residents' Alumni Day.

Alumni Day is held each year as residents complete their training in obstetrics and gynecology at MCG.

The event will be held June 23 and 24 with all lectures in room 108 of the

*Dr. Joseph P. Bailey*

rheumatology since 1967. He was associate dean for clinical sciences in the School of Medicine from 1972 to 1984. In 1984, he was named Charbonnier professor of medicine.

Dr. Bailey was director of MCG's Student Health Program from 1967 to 1972.

He is a member and past president of the Richmond County Medical Society, the Georgia Rheumatism Society and vice president for medical policy for the Georgia Physician's Health Network.

He is a member of the American Medical Association, the American Rheumatism Association, the Southern Medical Association and the American Federation for Clinical Research.

## Hospital baby party scheduled May 28

The 12th annual Baby Come Back Party, a reunion of former patients of the Medical College of Georgia Neonatal Intensive Care Unit and health care professionals who cared for them, is set for May 28.

The party will be held from 1:30-4 p.m. May 28 in the MCG Student Center.

About 200 children and their families are expected to attend, according to Marsha Janelle, administrative specialist for the MCG Section of Neonatology.

"It's not only a neat occasion for the babies and their families, but also for the staff to see how well the babies have done," she said.

Children who were patients in the NICU between April 1987 and March 1988 and those who attended last year's party are invited.

MCG's NICU provides the highest level of critical care to premature babies and newborns with medical problems such as congenital heart defects.

## Dr. Ling to be guest speaker

Dr. Frank Ling, associate professor in the Department of Obstetrics and Gynecology at the University of Tennessee at Memphis, will be the guest lecturer for the Medical College of Georgia Department of Obstetrics

and Gynecology Residents' Alumni Day.

Alumni Day is held each year as residents complete their training in obstetrics and gynecology at MCG.

The event will be held June 23 and 24 with all lectures in room 108 of the

Robert B. Greenblatt, M.D., Memorial Library.

Dr. Ling will discuss "Insights into Management of Chronic Pelvic Pain" June 23 at 2:20 p.m. and "1988 Approach to Management of Ectopic Pregnancy" June 24 at 10:15 a.m.

## United Way celebration

MCG United Way chairman Bill Hayes cuts cake at May 6 reception honoring departments which met 100 percent of their goal.

## Anesthesia conference scheduled May 27-29

The Medical College of Georgia Department of Anesthesiology will host the 14th annual Gulf-Atlantic Anesthesia Resident's Conference May 27-29.

Physicians-in-training at university-based medical centers from throughout the southeastern United States will present papers concerning biomedical research and the clinical practice of anesthesia.

Dr. Robert S. Crumrine, chairman of the MCG Department of Anesthesiology, will open the conference for paper presentations May 28 at 8 a.m.

Registration and a reception will be held May 27 from 6-9 p.m.

Residents and faculty from 15 major medical centers in 10 southeastern states will attend. Physicians from the Augusta area also are invited.

The conference will be held at the

Peter S. Knox Jr. Conference Center at Telfair Inns.

Those interested may pre-register by calling the MCG Department of Anesthesiology.

## 100 attend department's jamboree

Medical artists from around the country converged on the Dugas Building last month to hear lectures, discuss curriculum and have their work critiqued.

About 100 faculty and students from nine medical illustration programs attended the Medical Illustration Student Jamboree April 15 and 16. The MCG Department of Medical Illustration played host for this first meeting

of its kind, where program directors discussed enrollment, curriculum, funding and the future of the profession.

Students brought their work to be critiqued and heard 10 lecturers speak.

Organizers hope the event will become an annual one.

"It created such good feeling," said MCG professor of medical illustration

Octavia Garlington.

Programs represented included the University of Michigan, Johns Hopkins University, Ohio State University, the Rochester Institute of Technology, the University of Texas Health Sciences Center at Dallas, the University of Toronto, Colorado State University and the University of Illinois.

# Three labs accredited

The Medical College of Georgia Hospital and Clinics' Rheumatology Laboratory, Metabolic Bone Disease Laboratory and Family Practice Center Laboratory have been awarded a two-year accreditation by the Commission on Laboratory Accreditation of the College of American Pathologists (CAP).

The CAP laboratory accreditation program is one of the few recognized by the federal government as requiring adherence to standards equal to or more stringent than government standards.

CAP inspectors examine laboratory records and quality control for the two preceding years. They also examine the education and qualifications of the staff, the adequacy of the facilities, the equipment, laboratory safety and management.

MCG's rheumatology laboratory performs a variety of tests on the body's immune system to help physicians diagnose and treat rheumatic diseases.

MCG's metabolic bone disease laboratory performs a variety of functions, including studies that determine the density of bone.

The lab also checks phosphorus and magnesium levels in the body to help determine metabolic bone diseases such as osteoporosis. The information also helps monitor hyperparathyroidism, a condition in which the parathyroid glands, which regulate the body's calcium levels, are overactive. The lab also analyzes

ionized calcium to help monitor hyperparathyroidism.

The Family Practice Center Laboratory performs the majority of blood tests, including glucose tests needed by outpatients of the

MCG Department of Family Medicine. Examples include tests for strep throat, pregnancy and a variety of blood tests, including glucose levels.

## SWAP & SELL GUIDELINES

### PLEASE USE THE FORM PROVIDED BELOW FOR FREE ADS

- ✓ These free ads are for the use of MCG faculty, staff and students only. The general public may advertise by using the paid ad order form at right. You might pass along the paid ad form to friends.
- ✓ Do not use office or work phone numbers in your ads.
- ✓ No real estate items can refer callers to a real estate firm or realtor. Ad must refer callers to the owner.
- ✓ No items advertising church functions, bazaars, spaghetti dinners, auctions, etc., for civic organizations not affiliated with MCG.
- ✓ No items that appear to be a business venture — such as piano lessons, swimming lessons, dancing lessons, sewing, autos from car dealers, etc. — are allowed.
- ✓ Do not double advertise. Don't place a yard sale ad and then list items from the yard sale under separate headings.
- ✓ Ads that are illegible may be rejected.
- ✓ Ads that do not have all information required such as price, telephone number, etc., may be rejected.
- ✓ Do not run ads for any organization not sanctioned by MCG.
- ✓ Do not use any words that indicate there might be discrimination, for example: CHRISTIAN babysitter
- ✓ Babysitting ads will not be accepted, MCG provides day care service. Babysitter wanted ads may be run.
- ✓ Do not abbreviate. Your ad will work better if you spell out everything.
- ✓ All items for sale must include price

## TURN YOUR UNWANTEDS INTO CASH!

Reach thousands of potential buyers for that old bicycle or hair dryer you've got stuck in the corner. Remember, one man's junk is another man's treasure, so most anything you have is worth something to someone. Take a look around and turn your unwanteds into cash through our Beeper/Pulse Swap & Sell Section.

**Don't wait another minute!**

With this coupon, put your message in the hands of more than 12,000 MCG personnel and students in the only authorized MCG newspapers — for only a small charge. Write your own **Beeper/Pulse Classified** below with one word to each line, including the address and phone number you want in your ad. Please place only five words per line. **DO NOT ABBREVIATE.** Abbreviations count the same as the number of words abbreviated and ads incorrectly written may be shortened or refunded.

The prices below apply only when you write your own **Beeper/Pulse Classified** on this coupon or neatly on a sheet of paper and payment is enclosed. Discounts are available for multi-week insertions. Call 724-2122 for these prices or for help in writing your ad.

**CLIP AND MAIL FORM BELOW WITH CHECK OR MONEY ORDER**

### FREE SWAP & SELL ADS MUST BE TYPED OR NEATLY PRINTED ON THIS FORM OR A CLEAR PHOTOCOPY OF THIS FORM!

Consult Swap & Sell Guidelines to see if your ad qualifies. If it does not meet the qualifications, you may purchase a paid classified ad using the form provided elsewhere on this page. If it does qualify, deliver this form, when completed, to Institutional Relations, Building AI Room 108 on campus. Forms may also be mailed to: Beeper/Pulse Swap & Sell, Institutional Relations, Box AI 105, Augusta, Ga. 30912

#### DO NOT WRITE MORE THAN ONE AD PER FORM

For submitting more than one ad, you may secure additional copies of **The Beeper or Pulse** or make clear photocopies of this form.

## Homecoming '88

# 8 MCG alumni are honored

Eight Medical College of Georgia alumni received special honors during Homecoming weekend May 6-8.

Dr. Curtis G. Hames (Class of 1944) received a Distinguished Alumnus award for the MCG School of Medicine. Also receiving posthumous Distinguished Alumnus awards were the late Dr. Edgar R. Pund (Class of 1918) and the late Dr. George Lombard Kelly (Class of 1924).

Dr. Hames is internationally known for his research in cardiovascular disease. He is credited with discovering the "stroke belt," a region along the east coast from North Carolina to southeast Georgia where the high incidence of heart disease is attributed to the lack of certain nutrients in the soil. He is a recipient of a MacArthur Foundation grant, enabling him to teach research methods to doctors in third-world countries. Dr. Hames is the author of more than 100 articles in major medical journals and continues to practice general medicine in his hometown, Claxton, Ga.

Dr. Pund was chairman of the pathology before becoming president of MCG from 1953 to 1958. He was widely known for his work in cancer of the uterine cervix, and his department was one of the first to make extensive use of the Pap smear. During his presidency, Dr. Pund aided in placing Talmadge Hospital under the control of the Georgia Board of Regents. He also helped form the MCG Foundation. He retired in 1958 and died in 1975.

Dr. Kelly, a professor of anatomy recognized for his research in reproductive physiology, became dean of MCG in 1935 and the college's first president in 1950. As dean, Dr. Kelly played an important part in restoring MCG's Class A accreditation with the American Medical Association after it was revoked in 1934. Dr. Kelly also developed a statewide plan for medical education which included establishment of a teaching hospital in Augusta. He died in 1972.

Dr. T. Barrett Trotter (Class of 1973) received the Distinguished Alumnus Award for the School of Dentistry, where he is assistant clinical professor of orthodontics. Dr. Trotter is regional representative for the Eastern District, Georgia Dental Association, and is secretary-treasurer for the Eastern District, Dental Society of Georgia. He is a member of the Georgia Society Orthodontists, the American Association of Orthodontists, the Southern Society Orthodontists and the American Dental Association. He is a member of the Martinez-Evans Rotary Club, past president of the Augusta Dental

Society and is dental division chairman for the United Way, Easter Seals Society and American Cancer Society.

Teresa Ann Butler of Tifton, Ga., (Class of 1982) received the Distinguished Alumnus award for the School of Allied Health Sciences. Ms. Butler is a former instructor of dental hygiene at MCG and works for Oral-B Laboratories in Tifton. She is a summa cum laude graduate of MCG and is a member of the American Dental Hygienists' Association, the Georgia Dental Hygienists' Association, Sigma Phi Alpha, Phi Theta Kappa and Alpha Eta professional societies.

Dr. Bruce D. Goldman (Class of 1968) received the Distinguished Alumnus award for the School of Graduate Studies. Dr. Goldman received a Ph.D. in endocrinology from MCG and underwent postdoctoral training in endocrinology at the University of Texas Medical School, Dallas, and in neuroendocrinology at the University of California, Los Angeles. He is professor of physiology and neurobiology at the University of Connecticut. His research interests include neuroendocrinology and biological rhythms. He has served on National Institutes of Health study sections in endocrinology and biopsychology and is associate editor of the "Journal of Biological Rhythms." He has two Public Health Service research grants totalling approximately \$850,000.

Rose M. Jordan (M.S.N., 1975) and Dr. Marion E. Broome (B.S.N., 1973) were honored by the School of Nursing.

Ms. Jordan received the E. Louise Grant Award for an outstanding alumnus in practice and/or ad-

Honorees, standing with acting President Judson Hickey (center), are Dr. T. Barrett Trotter (from left), Dr. Bruce D. Goldman, Dr. Marion Broome, Rose Jordan and Dr. Curtis Hames

ministration. She is director of staff development and training at Gracewood State School and Hospital and assistant clinical professor, MCG Department of Mental Health Nursing. She is a member of Sigma Theta Tau national nursing honor society.

Dr. Broome received the Phoebe Kandel Rohrer Founders Award for an outstanding alumnus in research and/or education. She is director of MCG's Center for Nursing Research, associate professor of parent-child nursing and associate professor in the School of Graduate Studies, an instructor for the Childbirth Education Association of Augusta and a major in the Army Nurse Corps Reserve. She is a member of the Society for Research in Child Development, Sigma Xi, Sigma Theta Tau and the Council of Nurse Researchers, American Nurses Association.

# 9 retiring faculty members lauded

Ten members of the Medical College of Georgia faculty, including the school's acting president, a dean and an acting dean, are retiring and were honored at the May 12 faculty assembly.

Retiring as acting president is Dr. Judson C. Hickey, founder and the first dean of the MCG School of Dentistry. Dr. Hickey earned a doctor of dental science degree from Ohio State University. He served as assistant dean at the University of Kentucky College of Dentistry in 1965 and joined MCG as dean and professor of prosthodontics in 1966. He has served as acting president since 1987.

Dr. Hickey is a member of the American Dental Association, the American Prosthodontic Society, the Academy of Denture Prosthetics, the American College of Prosthodontists and the American Association of Dental Schools. He was named dentist of the year by the Eastern District Dental Society of the Georgia Dental Association in 1969 and received the association's Special Appreciation Award in 1976. He received the MCG School of Dentistry Alumni Association's first honorary alumnus award in 1981.

Retiring from the School of Allied Health Science is Dr. Raymond C. Bard, dean of the school since 1972. Dr. Bard earned a Ph.D. in microbiology and biochemistry from Indiana University and joined MCG in 1967 as vice president and professor of microbiology and cell and molecular biology. He served as acting dean of Allied Health Sciences from 1968 to 1972 and as acting dean of Graduate Studies from 1971 to 1972.

Dr. Bard is a member of the American Society for Microbiology and Sigma Xi. He has been a fellow in the American Academy of

Microbiology, the American Society of Allied Health Professions and the American Society for the Advancement of Science.

Retiring from the School of Dentistry are acting dean Leon A. Leonard and Drs. Steve Kolas, William R. Wege and Bruce H. Rice.

Dr. Leonard, associate dean for clinical sciences, has been the school's acting dean since 1987. Dr. Leonard earned a master's degree in endodontics and oral pathology from Loma Linda University and a doctor of dental sciences degree from the University of Southern California. He joined the MCG faculty in 1969. He was named professor and chairman of endodontics in 1973 and was named associate dean in 1975.

Dr. Leonard is speaker of the Georgia Dental Association House of Delegates. He is a member of Phi Kappa Phi, Omicron Kappa Upsilon, the American College of Dentists and Sigma Xi.

Dr. Kolas, a professor of oral pathology since 1968, was associate dean for students from 1979 to 1984. He earned a doctor of dental science degree and a master's degree in pathology from Ohio State University. He is a member of Omicron Kappa Upsilon, the American Board of Oral Pathology, the International Association for Dental Research, the American Association for the Advancement of Science, Sigma Xi and Psi Omega.

Dr. Wege, a professor and coordinator of dental radiology, earned a master's degree in dental radiology from the University of Alabama School of Dentistry and a doctor of dental science degree from the Marquette University School of Dentistry. He joined MCG as a research associate and associate professor in

1967. He was director of continuing education from 1971 to 1975 and was named coordinator of dental radiology in 1975.

Dr. Wege is a member of the Georgia Dental Association Finance Committee and House of Delegates and is executive secretary of the American Academy of Dental Radiology.

Dr. Rice, professor and chairman of oral medicine since 1969, earned a doctor of dental medicine degree from the University of Southern California, a master's degree in periodontology from Ohio State University and a Ph.D. in biochemistry and nutrition from the University of Arizona. He is a member of the American Dental Association, the American Academy of Periodontology, the American Academy of Oral Pathology, the American College of Dentists, the International Association for Dental Research and Sigma Xi.

Retiring from the School of Medicine are Drs. Ohlen R. Wilson and Elizabeth H. Cook.

Dr. Wilson, associate professor of family medicine, graduated from the Medical College of Virginia. He joined MCG as an assistant professor in 1978 and was named an associate professor in 1982. He is a member of the American Medical Association, the American Academy of Family Physicians, the Medical Association of Georgia, the Richmond County Medical Society and the Society of Teachers of Family Medicine.

Dr. Cook, associate professor of medicine and director of the rheumatology laboratories, earned a Ph.D. from MCG and the State University of New York. She joined MCG as an instructor in the department of medicine in 1969, was named

assistant professor in 1973, and was named associate professor in 1979. She is a member of the Georgia Rheumatism Society, the American Rheumatism Association and the American Association for the Advancement of Science.

Retiring from the School of Nursing is Leilee Ault, a professor of adult nursing. Ms. Ault earned a master's degree from the University of Pennsylvania. She joined MCG in 1955 as one of four founding faculty members in the School of Nursing. She was the school's acting dean from 1976 to 1977, associate dean from 1977 to 1978 and director of special projects from 1978 to 1980.

Ms. Ault was president of the MCG faculty in 1981 and is a member of Sigma Theta Tau. She received an outstanding faculty award in 1977 and the School of Nursing Alumni Phoebe Kandel Rohrer Founders Award in 1981.

Also retiring is John G. Lyon, assistant professor of biomedical engineering in the Office of Research Support Services. Mr. Lyon earned a master's degree in physiology from MCG. He joined the school's faculty as an instructor in 1970 and was named assistant professor in 1974. He is a member of the Association for Advancement of Medical Instrumentation.

Crowd gathers during President's Reception at old Medical College

## 5 honored as outstanding faculty

Five Medical College of Georgia faculty members received Outstanding Faculty awards at the May 12 faculty assembly. The awards are presented annually to a faculty member from each of MCG's five schools.

The recipients are:

Jessie O. Brown, School of Allied Health Sciences. Ms. Brown, associate professor of associated dental sciences, earned a master's degree in health education from MCG. She joined the MCG faculty in 1968 and was named associate professor in 1977. She is a member of the American Dental Hygienists' Association, Sigma Phi Alpha, the Central Savannah River Area Dental Hygiene Component Society and the Alpha Eta Society.

Dr. Norris L. O'Dell, School of Dentistry. Dr. O'Dell is an associate professor of oral biology in the schools of Dentistry and Graduate Studies and an assistant professor of anatomy in the School of Medicine. Dr. O'Dell earned a Ph.D. in anatomy from MCG in 1972 and graduated from the School of Dentistry in 1975. He joined the School of Dentistry faculty in 1972.

Dr. O'Dell is a member of Omicron Kappa Upsilon, a national dental honor society. He has served as president of the MCG schools of Dentistry and Graduate Studies alumni associations and as secretary and chairman of the biomedical sciences section of the Georgia Academy of Science.

Dr. Thomas H. Rosenquist, School of Graduate Studies. Dr. Rosenquist, a professor of anatomy, earned a Ph.D. in anatomy from Louisiana State University Medical Center and joined the MCG faculty in 1973. He is a member of the American Association for the Advancement of Science, the American Association of Anatomists, the Georgia Academy of Science, the Southern Society of Anatomists and the Georgia Institute of Human Nutrition.

He received a distinguished service award from the MCG School of Graduate Studies in 1987.

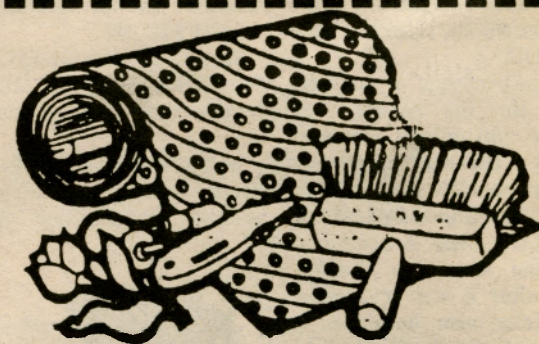

Dr. Francis J. Tedesco, School of Medicine. Dr. Tedesco, a graduate of the St. Louis University School of Medicine, is the school's interim dean, chief of the section of gastroenterology and vice president

for clinical activities. He is a member of the American Federation of Clinical Investigation, the American Gastroenterological Association, the American Society for Gastrointestinal Endoscopy, the American College of Physicians, the Medical Association of Georgia and the Richmond County Medical Society.

He is vice president of the Georgia division of the American Cancer Society.

Leilee P. Ault, School of Nursing. Ms. Ault, a professor of adult nursing, earned a master of science degree from the University of Pennsylvania. She joined MCG in 1955 as one of the four founding faculty members of the School of Nursing. She has been a member of the American Nurses Association, the National League for Nursing and Delta Kappa Gamma International. She was chairman of the MCG faculty in 1981 and is a member of Sigma Theta Tau.

Ms. Ault received an MCG Outstanding Faculty Award in 1977 and the MCG Nursing Alumni's Phoebe Kandel Rohrer Founders Award in 1981.

# Newsbriefs

## Beeper deadline

The deadline for the June 6 "Beeper" is May 30 at 5 p.m. Please inform personnel of any address changes to ensure delivery of "Beeper" to your home.

## Telephone directories

1988 Southern Bell directories are available in the MCG Warehouse. Directories were ordered for each telephone on campus. Please do not take directories home. Those who need extra directories at home may call the Southern Bell business office.

## Nurses to visit

The School of Nursing will host a visit of six nurses from Brighton, England, May 25-30.

## Potluck dinner

The MCG World Fellowship Organization will sponsor an international potluck dinner May 20 at 6:30 p.m. in the Student Center.

All are invited and asked to bring a favorite dish, preferably one representing participants' nationalities.

ty.

## Volunteers needed

Volunteers are needed to serve as host families for international students at MCG. More than 150 undergraduate and graduate students will arrive after July 1.

Host families: write an introductory letter before the student leaves his country; meet the student at the airport; give him a tour of MCG and Augusta; and treat him to a family meal periodically.

For more information or to volunteer, call Jean Dirksen, 738-2220, or Barbara Holzman, 868-5418.

## Tuition reimbursement

Classified MCG employees may apply for tuition reimbursement by completing an application form available from personnel, room CC-135.

To be eligible, applicants must: be a benefits-eligible employee; have been employed at MCG for at least six months as of June 3; enroll in an accredited program that is job- or career-related; receive a grade of 'C' or better; not be participating in

another reimbursement program; properly complete and submit application to CC-135 by June 3.

Call ext. 3779 for more information.

## Greenbaum elected

Dr. Lowell M. Greenbaum, dean of the School of Graduate Studies, has been elected to the 11-member executive committee of the Conference of Southern Graduate Schools. The conference has 162 member schools that develop programs for graduate education.

## Festival slated

The Belly Danz Club of Augusta will hold its fourth annual Arabian Nights Festival May 21 at 8:15 p.m. at the Knights of Columbus headquarters on Damascus Road. Tickets are \$15 and include an after-the-show dinner of East India Tandoori food.

Proceeds will benefit the Arthritis Foundation division of Juvenile Arthritis. Tickets are available from Belly Danz Club members, coordinator Mrs. Thomas Mangelly (798-1831) and Home Folks News and Record Shops. Reservations are re-

quested.

## Cholesterol studies

Volunteers age 21 to 70 with high blood cholesterol are wanted for studies of new medications and diets that lower cholesterol. Studies vary from 8 months to 2 years and are free. Call ext. 4861. Diabetics are ineligible.

## Drug study

Volunteers with asthma who take Theophylline regularly are needed for a drug study. Participants will be paid. Contact Lisa Wood, ext. 3531.

## Reimbursement

MCG classified employees and nursing administration employees may apply for tuition reimbursement for summer quarter by completing an application form available from personnel, room CC-135.

Because the majority of applicants attend schools on the quarter system, the deadline, June 3, is prior to summer quarter registration. The fall quarter deadline is Sept. 2 and the winter quarter deadline is Dec. 2.

For more information, contact Mary Hagan or Kathy Baumgartner, ext. 3779.

Once upon a time Joe and Susan went out for a drink, then they had another drink, and then another and another... and they did not live happily ever after...
