

UNIVERSITY OF GEORGIA

Forty-Seventh Annual Announcement
of the
Medical College of Georgia,
(AUGUSTA, GA.)

The
MEDICAL DEPARTMENT
of the
UNIVERSITY OF GEORGIA.

SESSION 1878-'79.

Sainsimon & Morrison, Printers and Binders.

UNIVERSITY OF GEORGIA.

CHANCELLOR OF THE UNIVERSITY.

H. H. TUCKER, D.D., LL.D.

FACULTY OF THE MEDICAL DEPARTMENT.

I. P. GARVIN, M.D.,

Emeritus Professor of Materia Medica and Therapeutics.

LEWIS D. FORD, M.D., LL.D.,

Professor of the Institutes and Practice of Medicine.

JOSEPH A. EVE, M.D.,

Professor of Obstetrics and Diseases of Women and Infants.

L. A. DUGAS, M.D., LL.D.,

Professor of the Principles and Practice of Surgery.

GEO. W. RAINS, M.D.,

Professor of Medical Chemistry and Pharmacy.

HENRY F. CAMPBELL, M.D.,

Professor of Operative Surgery and Gynecology.

DeSAUSSURE FORD, M.D.,

Professor of Descriptive and Surgical Anatomy, and Dean of the Faculty.

EDWARD GEDDINGS, M.D.,

Professor of Physiology and Pathology.

ROBERT C. EVE, M.D.,

Professor of Materia Medica and Medical Jurisprudence, and Secretary of the Faculty.

GEORGE C. DUGAS, M.D., Adjunct to the Professor of Surgery.

GEORGE A. WILCOX, M.D., Demonstrator of Anatomy,

and Prosecutor to the Professor of Anatomy.

THOMAS R. WRIGHT, M.D., Assistant Demonstrator of Anatomy.

CLINICAL ASSISTANTS AND LECTURERS ON SPECIAL SUBJECTS.

GEORGE C. DUGAS, M.D., Minor Surgery.

GEORGE A. WILCOX, M.D., Nervous Diseases.

THOMAS R. WRIGHT, M.D., Diseases of Chest.

CHARLES W. HICKMAN, M.D., Ophthalmology.

E. C. GOODRICH, M.D., Exanthematous Diseases.

A. E. DUGAS, M.D., Diseases of Male Organs of Generation.

A. H. BAKER, M.D., Diseases of Female Organs of Generation.

JOSEPH EVE ALLEN, M.D., Diseases of Children.

CHARLES T. RICH, Janitor.

Annual Announcement.

THE FORTY-SEVENTH SESSION will commence on the First Monday in October, 1878, and end the 1st of March, following. The usual introductory address will be delivered by one of the Faculty.

The continued success of the Medical College of Georgia is gratifying to the Professors, as well as to more than 1,300 graduates, and upwards of 5,000 medical students, whose opinions and interests have been so much affected thereby.

For several years, it has been evident, that there is an earnest desire, of the profession and the general public, to see our present standard of medical education, raised to a level, more commensurate with the practices of other enlightened nations, and the high status of American civilization in other directions, and some of our more independent colleges have already initiated most important reforms to this effect, and with marked success. It has always been the desire of the authorities of the Medical College of Georgia, to be among the foremost, in such laudable efforts, and, with this view, in 1876, sent a delegate to the Convention of Medical Colleges, then in session at Philadelphia, with plenary powers to pledge the co-operation of the College in any plan of reform the Convention might adopt. Their well meant endeavors have, hitherto, been frustrated by the failure of competing colleges to co-operate, but, with the object of doing all in their power, at present, they have determined to extend the duration of the course to Five months instead of Four, and thus afford more time for practical demonstrative teaching.

The Faculty have appointed a number of gentlemen as Lecturers upon special subjects, some of whom have recently returned from European Schools, who are prepared to repeat the most recent experiments and practices of distinguished specialists. Every facility will be extended to them and our students, as ample opportunities for practical demonstrations are afforded by our clinical material, *which is probably more abundant, and more easily controlled, than any location in the South.*

The facilities of the School, for Clinical and other purposes, are quite equal to those of any other. The Museum is fully supplied with every convenience for Pathological, Anatomical, Physiological and Obstetrical studies; the Library contains about 5,000 volumes, accessible to the student; the Chemical Laboratory is more extensive and better arranged than in most institutions; Anatomical facilities not surpassed by any similar institution in the interior; a Cabinet of Materia Medica, full and complete.

The Clinical resources are ample, the CITY HOSPITAL, FREEDMAN'S HOSPITAL and CITY DISPENSARY, all of which, are under the control of the Faculty, affording abundant material for Clinical instruction.

HOSPITALS.

The CITY HOSPITAL is situated within the same enclosure as the College building, and therefore convenient for Clinical and Operating purposes. Its successful management by the Sisters of Mercy, and the liberal support by the City Council, secures a full list of inmates.

The FREEDMAN'S HOSPITAL, also enjoying the patronage of the City Council, abounds with interesting cases.

The CITY DISPENSARY is also located at the College. From 3 to 5 P. M., daily, a member of the Faculty meets the sick poor in the presence of the class; prescribes for and lectures on the cases then present. *The aggregate of these several resources enables us to challenge comparison with most schools, and the diligent student can extract therefrom an amount of practical information often sought in vain in a more pretentious outfit.* As Colleges in the interior are sometimes thought to be deficient in Clinical advantages, we beg to direct the attention of the profession to our resources in this particular. Numerous opportunities are presented for acquiring practical knowledge of the best methods of examining and exploring the pelvic organs, with speculum, sound, etc. Obstetrical cases are assigned to the advanced students, under proper direction. It is also proper to mention the practical application of all modern improvements, for the diagnosis and treatment of disease, as the Ophthalmoscope, Laryngoscope, etc. Electricity, in its therapeutical uses,

and the Spectroscope—the most wonderful instrument of modern invention—receive, at the hands of the Professor of Chemistry, due attention.

The Lecture Rooms have been renovated, and the Amphitheatre made more comfortable by cushioned seats, and the entire building is in excellent condition.

The Private examinations by the Professors, which are considered a superior feature of the institution, and which afford opportunity for friendly relations between teachers and pupils, will be continued.

PRACTICAL ANATOMY.

Every facility, and the most ample supply of material, will be afforded for prosecuting this important branch. The hall is comfortable, supplied with gas light and convenient water, and is well adapted to Dissecting purposes. Dissection is done at night, under the direction of the Demonstrator and his Assistants.

FEES, ETC.

In harmony with the scale of Fees adopted by other departments of the University, as well as in compliance with the implied wish of the profession for lower rates of tuition, the following schedule of charges will be observed :

MATRICULATION (to be taken once).....	\$5.00
TICKETS OF FULL COURSE.....	50.00
PRACTICAL ANATOMY (once).....	10.00
DIPLOMA.....	30.00

BENEFICIARIES.

This institution has always recognized the claims of deserving and aspiring young men, who are not able to incur the expense of a thorough Medical Education, and admitted them without invidious distinction. In compliance with the requirements of the Charter, two students from each Congressional District of Georgia will be admitted gratuitously. Application should be made to the Dean, *accompanied with certificates from either the Judges of the Superior Court, or Ordinary of the Country.*

REQUISITES FOR GRADUATION.

No student shall be an eligible candidate for the Degree of Doctor of Medicine until he shall have attended two full courses of lectures in this, or one in this, and one in some other Medical Institution, in addition to the usual private readings in Medicine, and in no case shall a student of immoral character be admitted to examination. The *thesis*, hitherto required, is left optional with the candidates.

TEXT BOOKS.

The books mentioned below are recommended in preference to others ; but recent editions of any standard works may be used.

ANATOMY.—Richardson's, Wilson's, Holden's, and Gray's Anatomy.

SURGERY.—Erichsen's, Gross', Ashurst's, and Hamilton's Surgery.

CHEMISTRY AND PHARMACY.—Fownes' Chemistry, and Parish's Practical Pharmacy.

PRINCIPLES AND PRACTICE OF MEDICINES.—Flint's, Nieme-ry's and Bennett's Practice.

OBSTETRICS AND DISEASES OF WOMEN AND INFANTS.—Churchill's, Caseaux's Midwifery.

MATERIA MEDICA AND MEDICAL JURISPRUDENCE.—U. S. Dispensatory, and Stille's Therapeutic's and Materia Medica, Taylor on Medical Jurisprudence.

PHYSIOLOGY AND PATHOLOGY.—Dalton's Physiology, Paget's Pathology, and Virchow's Cellular Pathology.

SURGICAL ANATOMY AND OPERATIVE SURGERY.—Pancoast's Operative Surgery, Erichsen's Surgery, Wilson's and Gray's Anatomy.

WORKS ON SPECIAL SUBJECTS.—Bumstead on Venereal Diseases ; Flint on Diseases of Lungs and Heart ; Tobold on Diseases of the Throat ; Mackenzie on the Laryngoscope ; Wells on Diseases of the Eye ; Turnbull on the Diseases of the Ear ; Rindfleisch's Pathological Histology.

BOARD.

Board can be procured in the city from \$20 to \$25 per month. The Janitor is supplied with a list of boarding houses.

SUMMARY OF GRADUATES.

There have been 1,354 Graduates of this Institution.

UNIVERSITY OF GEORGIA,

H. H. TUCKER, DD., LL.D., CHANCELLOR.

BOARD OF TRUSTEES

—:OF:—

MEDICAL DEPARTMENT.

HON. HERSCHEL V. JOHNSON, PRESIDENT.

HON. JOS. B. CUMMING, VICE PRESIDENT.

THOS. B. PHINIZY, SECRETARY.

HENRY R. CASEY, M.D.

L. A. DUGAS, M. D., LL.D.

LEWIS D. FORD, M.D., LL.D.

EDWARD GEDDINGS, M.D.

DESAUSSURE FORD, M.D.

HON. TIMOTHY FURLOW.

W. H. DOUGHTY, M.D.

ALBERT C. MATTHEWS, M.D.

JOS. A. EVE, M.D.

HENRY F. CAMPBELL, M.D.

WM. S. JONES, M.D.

H. H. TUCKER, DD., LL.D.
