Welcome to Scholarly Commons, the institutional repository for Augusta University.

[Submit Scholarly Works](#)

The University Libraries offer advisory support to faculty who want to create open access journal publications or have questions regarding copyright, author rights, and publisher contracts. Individuals may submit scholarly works or departments may submit a collection of works. Additional information about Scholarly Commons can be found on this [Research Guide](#).

Electronic Thesis and Dissertations are now available through Scholarly Commons!
Electronic Theses and Dissertations between 2005 - present are now available online! The [Theses and Dissertations collection](#) can be searched by abstract, author, date, title, and keyword. Theses and Dissertations are restricted to Augusta University affiliates or the campus network. If you are off campus you can access the Theses and Dissertations by logging in with your NetID and Password.

Welcome to the Research Services guide!

This guide was created to serve the reference and research needs of faculty conducting research. Librarians are available to assist researchers in finding relevant, trustworthy information for educational purposes, research projects, and patient care. We can also help with using citation management software, finding grant funding, and collaborating on grant submissions and publications.

Planning and Implementation

Tools

KEY CHARACTERISTICS OF A SYSTEMATIC REVIEW

Systematic reviews are a rigorous, comprehensive, and transparent review of the literature to answer a specific research question. Twelve months is a reasonable timeframe for completion. Some characteristics include:

- a clearly stated set of objectives with pre-defined eligibility criteria for studies;
- an explicit, reproducible methodology;
- a systematic search that attempts to identify all studies that would meet the eligibility criteria;
- an assessment of the validity of the findings of the included studies, for example through the assessment of risk of bias;
- a systematic presentation, and synthesis, of the characteristics and findings of the included studies. (Green)

OTHER TYPES OF REVIEWS

NARRATIVE OR LITERATURE REVIEW

RAPID REVIEW

SCOPING REVIEW

UMBRELLA REVIEW (Review of Reviews)

DETAILS ON THESE AND OTHER TYPES OF REVIEWS

a traditional review of published materials without specific protocols, criteria, or quantitative analysis; broad overview of a research topic; subjective summaries

Demeyin W. [Traditional reviews vs. systematic reviews](#) [Internet]. Students 4 Best Evidence. 2016 [cited 2018 Jan 16].
